C.C. Song (415) 464-6018 csong@mceCleanEnergy.org	Marin Clean Energy	July 5, 2016

Based on concerns raised by other parties about the Issue Paper on Wholesale Billing Determinant, MCE thereby withdraws its support for Clean Coalition's proposal, which was submitted on June 30, 2016.

MCE understands that there are significant technical errors in Clean Coalition's proposal, include fundamental characterizations of how TAC is currently assessed, and the mechanisms for cost recovery. The comments submitted by the California Large Energy Consumers Association adequately detailed these errors. If Clean Coalition decides to further pursue TAC reforms, these concerns need to be addressed.

As instructed by CAISO staff, MCE submits this filing to formally withdraw its support for Clean Coalition's proposal.
