

Market Update Call Meeting Minutes

December 05, 2019¹

Agenda

- 1) Updates and Meeting Minutes Review – Rahul Kalaskar
- 2) Weekly Performance Report – Rahul Kalaskar
- 3) Price Correction Reports – Dov Qunit
- 4) General Questions/ Comments– Rahul Kalaskar

Weekly Market Performance Report

For the days between November 13, 2019, through November 26, 2019 the day-ahead market observed more than \$100/MWh prices for DLAP on some days for the net load peak hours. These high prices are mainly driven by steep load ramps observed after sunset. The root cause of price excursion in both the five and fifteen-minute market is shown on the first tab on of the report.

Review of the Price Correction Report

During the week of November 18 - 22, 2019, the ISO processed 19 intervals for price corrections due to software defect. During the week of November 25 - 27, 2019, the ISO processed three intervals for software defect.

Questions on Price Correction Report

None

General Reminders

- **NOTE:** The current best practice, and preferred method, of asking questions is to route through the **Customer Inquiry, Dispute and Information** system, “CIDI”.
- Please submit your questions ahead of the call; there are occasions when we have to gather information: submission ahead of time allows us more preparation time to reply.
- To add general comments/questions/requests to the **action item list or meeting agenda**, market participants should also open corresponding CIDI tickets with both the Functional Environment as “Market Performance” and SCID as “XPUB” by close of business (COB) on Mondays.

¹ The California ISO (CAISO) hosts this bi-weekly market update conference call, generally at 10:15AM PST bi-monthly on Thursdays. This call is an opportunity for market participants to ask general questions regarding the market. Please send any questions to [CIDI system](#), which includes questions that have proprietary information and that might be commercially sensitive.
