

Market Update Call Meeting Minutes

November 21, 2019¹

Agenda

- 1) Updates and Meeting Minutes Review – Rahul Kalaskar
- 2) Weekly Performance Report – Rahul Kalaskar
- 3) Price Correction Reports – Dov Qunit
- 4) General Questions/ Comments– Rahul Kalaskar

Weekly Market Performance Report

For the days between October 30, 2019, through November 12, 2019 the day-ahead market observed more than \$100/MWh prices for DLAP on some days for the net load peak hours. These high price are mainly driven by steep load ramps observed after sunset. The root cause of price excursion in both the five and fifteen-minute market is captured on the first tab on of the report.

Review of the Price Correction Report

During the week of November 4 - 8, 2019, the ISO processed 61 intervals for price corrections due to software defect and data input error. During the week of November 11 - 15, 2019, the ISO processed 106 intervals for price corrections due to data input error.

Questions on Price Correction Report

None

General Reminders

- **NOTE:** The current best practice, and preferred method, of asking questions is to route through the **Customer Inquiry, Dispute and Information system, “CIDI”**.
- Please submit your questions ahead of the call; there are occasions when we have to gather information: submission ahead of time allows us more preparation time to reply.
- To add general comments/questions/requests to the **action item list or meeting agenda**, market participants should also open corresponding CIDI tickets with both the Functional Environment as “Market Performance” and SCID as “XPUB” by close of business (COB) on Mondays.

¹ The California ISO (CAISO) hosts this bi-weekly market update conference call, generally at 10:15AM PST bi-monthly on Thursdays. This call is an opportunity for market participants to ask general questions regarding the market. Please send any questions to [CIDI system](#), which includes questions that have proprietary information and that might be commercially sensitive.
