

NRG Energy Comments

A few comments on the redlined tariff language for providing seven days' advance notice for transmission outages.

First – it is difficult to mark up tariff language in .pdf format. Maybe that's what you had in mind.... :>)

Second, I offer one minor proposed edit:

Section 9.3.6.3.2: "A Participating TO shall submit a request for a transmission Maintenance Outage or a request to change...." Further, the words "on its system" in this section seem unnecessary.
