<p>Please provide a title for the issue.</p>			
<p>Market Commitment Process Constraints</p>			
<p>Please provide a summary description of the issue (i.e. 500 words)</p>			
<p>There is no specific constraint in the day-ahead or in the real-time unit commitment processes that applies any logic to limit commitments to the hours an EIM Participating Resource or a market participant with a non-resource adequacy resource supplies a bid. These are voluntary offers that should not be committed outside the timeframes in which they are offered.</p>			
<p>Please provide any data/information available that would characterize the importance or magnitude of the issue.</p>			
<p>This issue was identified in the Commitment Cost and Default Energy Bid Enhancement, but was determined to be outside of the scope for that initiative. This market enhancement is extremely important to support a non-must offer market for non-resource adequacy resources.</p>
