Re: Notice of Planned Decisional Classification for “2017 Expedited GIDAP Enhancements”

Any objection by the Chairs to this decisional classification is due by November 2, 2017.

This is formal notice of ISO Management’s decisional classification for the “2017 expedited GIDAP enhancements” initiative. Any objection by the Chairs to the decisional classification is due by November 2, 2017. Otherwise, this initiative will be presented for decision consistent with the classification described below.¹

This initiative does not fall within the authority delegated to the EIM Governing Body because it concerns enhancements to the process for interconnecting to the ISO controlled grid. The initiative will go to the Board for approval and the EIM Governing Body will have no role in approval.

This initiative has not been included in previous Briefings on Policy Outlook because the expedited stakeholder process was started after the July 13, 2017 EIM Governing Body meeting, when the most recent Briefing on Policy Outlook was provided.

The draft final proposal for this initiative is located [here](#). Additional relevant papers for this initiative are located [here](#).

Written stakeholder comments on the draft final proposal were due October 23, 2017. No stakeholder identified this matter as relating to the energy imbalance market, requiring EIM Governing Body review.

¹ The process is described in the Guidance for Handling Initiatives within the Decisional Authority or Advisory Role of the EIM Governing Body at <http://www.caiso.com/Documents/GuidanceforHandlingPolicyInitiatives-EIMGoverningBody.pdf>.
