

# Notice

**To:** David Olsen, Chair, Board of Governors  
Valerie Fong, Chair, EIM Governing Body

**From:** Roger Collanton, Vice President, General Counsel and Corporate Secretary

**Date:** January 22, 2019

**Re:** Notice of Planned Decisional Classification for “2018 Interconnection Process Enhancements”

---

***Any objection by the Chairs to this decisional classification is due by January 29, 2019.***

This is formal notice of ISO Management’s decisional classification for the topics addressed in the second addendum to the draft final proposal for the “2018 interconnection process enhancements” initiative. Any objection by the Chairs to the decisional classification is due by January 29, 2019. Otherwise, this initiative will be presented for decision consistent with the classification described below.<sup>1</sup>

This initiative does not fall within the authority delegated to the EIM Governing Body because it concerns the process for interconnecting generation to the ISO controlled grid. The initiative will go to the Board for approval and the EIM Governing Body will have no role in approval.

The second addendum to the draft final proposal for this initiative is located at <http://www.caiso.com/Documents/SecondAddendumtotheDraftFinalProposal-2018InterconnectionProcessEnhancements.pdf>. Additional relevant papers for this initiative are located <http://www.caiso.com/informed/Pages/StakeholderProcesses/InterconnectionProcessEnhancements.aspx>.

Written stakeholder comments on the addendum to the draft final proposal were due January 11, 2019. No stakeholder identified this matter as relating to the energy imbalance market, requiring EIM Governing Body review.

---

<sup>1</sup> The process is described in the [Guidance for Handling Initiatives within the Decisional Authority or Advisory Role of the EIM Governing Body](#).
