Pacific Gas and Electric Company (PG&E) offers the following comments on the California Independent System Operator's (CAISO) Black Start and System Restoration Phase 2 Draft Tariff Language. PG&E generally supports the CAISO's proposed tariff amendments but seeks clarification on the change to strike Voltage Support from the list of Ancillary Services referenced in Sections 8.1 and 11.10.2. PG&E seeks to understand whether this deletion is due to a policy change with respect to the provision and compensation for resources providing Voltage Support or is merely an incidental tariff clean-up item. If the latter, PG&E would appreciate information on the original tariff change necessitating the clean-up.

PG&E looks forward to further discussion of this matter during the stakeholder call on May 15.
