PG&E supports the CAISO’s Metering Rules Enhancement Initiative which would allow ISO Metered Entities (ISOMEs) to maintain their status quo. PG&E encourages the CAISO to work with new resource owners, where appropriate, and continue granting exemptions for resources that choose to be an ISOME. PG&E also recommends the CAISO provide clear guidelines to all Scheduling Coordinators (SCs) and SC Metered Entities (SCMEs) on annual Settlement-Quality Meter Data (SQMD) self-audit requirements.
