Pacific Gas & Electric Comments
CRR Credit Policy and Release 2 Draft Tariff Language

May 22, 2008

PG&E has a single minor edit at this time - the deletion of a redundant clause.

> 36.8.2.2.1 Each month, LSEs whose Load forecasts are verifiable in accordance with Section 36.8.6, will submit hourly Load forecast data for the relevant month. ~~For the Load for which the LSEs submits forecast data, e~~Each month the CAISO~~,~~ will use the LSE's submitted hourly Load forecast data for the relevant month to calculate two Load duration curves (one on-peak and one off-peak Load duration curve for the applicable month) to form the basis for monthly allocations for each CRR Sink in which the LSE serves Load.

Regards, Kurt
