Topic 1 – Affected Systems

Topic 2 – Time-In-Queue Limitations

PG&E supports the revised draft tariff language with qualification.

PG&E supports the addition of Section 6.7.4 as it accommodates phased and complex projects with timelines that extend beyond the existing time-in-queue limits of the tariff. PG&E understands that COD changes would follow the material modification process established by the tariff in Appendix DD, Section 6.7.2, and detailed in the Business Practice Manual for Generator Management, whereby the applicable PTO(s) also evaluate the material impact of COD changes.

PG&E reiterates our support for the CAISO's ongoing efforts to improve and enhance the interconnection process.
