Spring and Independent 2017 Releases MAP Stage Availability

MAP Stage Scheduled Maintenance –

Upcoming maintenance –

MRI-S GUI only offline, available May 1, 2017

CMRI offline available April 4, 2017

MAP Stage Daily Maintenance Window - Tuesday, Wednesday, Thursday and Friday 16:00 – 20:00

MAP Stage Weekly Maintenance Window - Monday 08:00 – Tuesday 09:00

Please refer to the MAP Stage portal at <https://portalmap.caiso.com> for specific application availability information.

OASIS LMPM Enhancements reports deployed to MAP Stage March 15, 2017 –

1. PRC_MPM_RTM_NOMOGRAM_CMP RTD - now has data for TD 3/23 Intervals 8-12. This report will only have data when the nomogram is binding, thus will be intermittent.
2. PRC_MPM_CNSTR_CMP - RTD - this report has data TD 3/22 starting HE12
3. PRC_MPM_RTM_REF_BUS - RTD - this report has data TD 3/22 starting HE12

Known Issues

#	System	Summary	Status	Estimated Fix Date
1	MRI-S	Implementation of the requirement stated in MRIS-BRQ085 for allowing users within the same organization to view the batch submission status is being delayed in market simulation pending further security validations.	Open	This will be implemented prior to the close of market simulation, date TBD.
2	MRI-S	The error description for error code 1028 incorrectly has X and Y instead of the actual meter value and PMAX, respectively.	Open	This will be implemented prior to the close of market simulation, date TBD.
3	MRI-S	Intermittent issues with Export function in the UI not returning expected results.	Open	This will be fixed prior to the close of market simulation. For now, the ISO is planning on opening the UI without the export function to allow further testing on other functionality.
4	MRI-S	UpdateSinceDateTime does not allow time input	Open	This will be fixed prior to the close of market simulation, date TBD.
5	MRI-S	IntervalEndTime for 3/12/2017 (DST Date) is not displaying correctly	Open	This will be fixed prior to the close of market simulation, date TBD.

Next Steps

MPM Not Competitive constraints on Oasis

The screenshot displays the OASIS web application interface. At the top, the browser address bar shows the URL: <http://oasismap.caiso.com/mrioasis/logon.do>. The page header includes the California ISO logo and the OASIS title. Below the header, there are navigation tabs for ATLAS REFERENCE, REPORT DEFINITION, PRICES, TRANSMISSION, SYSTEM DEMAND, ENERGY, ANCILLARY SERVICES, and CONGESTION REVENUE RIGHTS. The PRICES tab is currently selected.

The main content area is divided into several sections:

- Date Range:** Date From: 02/15/2017 To: 02/15/2017
- Download Options:** Download XML, Download CSV
- Market Power Mitigation Status Table:**

- Report Generated:** 02/16/2017 01:44:00
- Constraint List:** A list of various constraints such as Locational Marginal Prices, Scheduling Point/Tie Combination Locational Marginal Prices, Interval Locational Marginal Prices, etc.
- Constraint Matrix:** A table showing the status of constraints for different hours (HE14 to HE23). The matrix includes columns for HE14, HE15, HE16, HE17, HE18, HE19, HE20, HE21, HE22, and HE23. The rows represent different constraint types, with values 'Y' (Yes) or 'N' (No) indicating the presence of the constraint.

At the bottom of the page, there is a footer with the California ISO logo and the text "Page 16".

Key points

- Input bid from corresponding RTPD is used in RTD LMPM. It can be market bid, or mitigated in RTPD bid.
- RTPD mitigated bid can be mitigated farther in RTD.
- RTD LMPM evaluates second interval. If bids are mitigated, they will be used for binding interval of next RTD.
- Mitigated bids will be used within quarter of the hour (15 min interval corresponding to RTPD interval).
Corresponding RTPD input bids used at the beginning of every quarter.
- EIM bids will be mitigated if EIM MCP is higher than CAISO MCP.

Market Simulation Issue Management

- Submit all issues to the ISO CIDI case management system
 - CIDI tickets will need to have
 - ‘Functional Environment’ = “Market Simulation Spring 2017”
 - Or ‘Functional Environment’ = “Independent Market Simulation 2017”
- to be reviewed by ISO SME’s
