

Removing the Requirement to Develop an Annual Comprehensive Statewide Plan from the California ISO Tariff

Straw Proposal

May 25, 2017

The ISO recommends that the ISO tariff the requirement that the ISO develop the Conceptual Statewide Plan be removed

- In 2010, the ISO adopted tariff language regarding development of the conceptual statewide plan as part of its participation in the California Transmission Planning Group (CTPG)
- Since 2010, the ISO has prepared and published the conceptual statewide plan as part of its annual planning process cycle
- Notable changes have occurred that support removing this tariff requirement
 - Interregional planning requirements of FERC Order No. 1000 have been implemented
 - CTPG is no longer functioning
- Currently, the ISO is developing the conceptual statewide plan on its own accord, which defeats the fundamental purpose of developing the conceptual statewide plan
- There is little if any value in the ISO alone developing the conceptual statewide plan

Next Steps

- Please submit stakeholder comments to initiativecomments@caiso.com by June 8.
