Purpose

This procedure provides guidelines for:

- Change management for Reliability Coordinator (RC) Operating Procedures, Methodologies and Operating Guides
- Distribution of RC Operating Procedures, Methodologies and Operating Guides
- Document exchange with other entities such as Balancing Authorities, Transmission Operators and neighboring Reliability Coordinators

*This document is controlled when viewed electronically.
When downloaded or printed, this document becomes UNCONTROLLED.*

	Reliability Coordinator Procedure	Procedure No.	RC0550
		Version No.	1.3
		Effective Date	4/01/24
Reliability Coordinator Procedure Development, Maintenance and Distribution		Distribution Restriction: None	

1. Responsibilities

RC West
RC Working Groups
Operationally Affected Parties
RC Oversight Committee
CAISO Procedure Control Desk

1.1.1. RC West

- Creates new RC Operating Procedures and Methodologies
- Creates new Operating Guides in collaboration with operationally affected parties
- Reviews new RC documents and major changes with the appropriate working groups and operationally affected parties and provides opportunities for edits and feedback
- Informs appropriate working groups of minor implemented changes
- Informs RC Oversight Committee of RC document changes
- Manages urgent new or revised RC documents which are driven by NERC Alerts or other regulatory mandates, and informs the RC Oversight Committee and appropriate working groups. Works with the appropriate working group and operationally affected parties for post review and further revisions through the normal process.
- Facilitates periodic reviews of existing RC documents with appropriate working groups and operationally affected parties per a routine schedule or as needed

1.1.2. RC Working Groups

- Collaborates with RC West on new RC Operating Procedures and Methodologies
- Reviews changes and provides edits and feedback
- Participates in periodic review processes and provides edits and feedback
- Approves new procedures
- Working Group Chair escalates to RC Oversight Committee to request guidance if unable to resolve within working group activities

1.1.3. Operationally Affected Parties

- Collaborates with RC West on new Operating Guides
- Reviews and provides edits and feedback to major and minor changes to Operating Guides

*This document is controlled when viewed electronically.
When downloaded or printed, this document becomes UNCONTROLLED.*

	Reliability Coordinator Procedure	Procedure No.	RC0550
		Version No.	1.3
		Effective Date	4/01/24
Reliability Coordinator Procedure Development, Maintenance and Distribution		Distribution Restriction: None	

- Participates in periodic review processes and provides edits and feedback

1.1.4. RC Oversight Committee

- Adds RC document related items to future meeting agendas
- Discusses and provides feedback for unresolved working group issues
- Requests additional information from working groups as needed
- Determines if revisions need Oversight Committee approval, further action or no action
- Provides opinions and decisions related to RC documents to RC West
- Approves new Operating Procedures and Methodologies
- Provides guidance and direction to working groups as needed or requested

1.1.5. CAISO Procedure Control Desk

- Provides guidance regarding use of RC document templates and application of style guide
- Facilitates internal CAISO review of RC documents
- Performs quality review after content is finalized
- Ensures consistent record of RC document approvals and publication

2. Scope/Applicability

2.1. Background

RC West documents can generally be categorized as Operating Procedures, Methodologies and Operating Guides. These documents are generally maintained in standardized templates, which use a consistent style guide. These documents may be supported by appendices, which can also be referred to as “attachments”.

RC West documents provide implementation level details and business rules which are consistent with the policies and rules provided in the CAISO Tariff, Business Practice Manuals, NERC standards and other regulatory guidelines. In general, RC West documents shall not duplicate content contained in policy or regulatory level documents, except to the extent where quoting the source or adding a reference in a footnote provides clarity.

RC documents are prepared, maintained and distributed in a manner which is consistent with CAISO Tariff Sections 22.11 Operating Procedures and BPM Development and Amendment and 22.11.3 Requests for and Access to Nonpublic Operating Procedures.

*This document is controlled when viewed electronically.
When downloaded or printed, this document becomes UNCONTROLLED.*

	Reliability Coordinator Procedure	Procedure No.	RC0550
		Version No.	1.3
		Effective Date	4/01/24
Reliability Coordinator Procedure Development, Maintenance and Distribution		Distribution Restriction: None	

2.2. Scope/ Applicability

This procedure provides the guidelines necessary for RC document revision, review, approval, and publishing. These guidelines should be followed anytime there is cause for the revision of an RC document.

3. Procedure Detail

3.1. RC Document Categories

RC West Operating Procedures and Methodologies

These documents contain overarching processes and principles that impact all Balancing Authorities (BAs) and Transmission Operators (TOPs) in the RC West area or support specific RC West operations processes. Examples of these documents include SOL Methodology, Outage Coordination Process, SOL/ IROL Mitigation (in general, not area specific), Communications Testing, Real-Time Event Notifications, IRO-010 Data Specifications, etc.

Documents in this category generally only undergo major revisions when there are NERC/ WECC or other regulatory changes or if policy or process changes are needed or requested through the working group processes. Major changes to these documents could result in impacts to BA and TOP processes and/or systems, and as such they should be approved by the assigned working groups. Procedures which support specific RC West operations processes may not result in changes to BA and TOP processes, but are handled in a consistent manner in order to ensure impact analysis is performed prior to major changes being implemented.

Operating Guides

These documents contain area specific operating plans which may impact some, but not all BAs and TOPs. Examples of these documents include special operating conditions like WECC Open Loop operations, as well as area specific plans for SOL or IROL mitigation.

SOL and IROL related documents are addressed in accordance with RC0610 System Operating Limits Methodology for the Operations Horizon. If time allows in advance of real-time, RC West collaborates with the operationally affected parties to document the operating plan in an Operating Guide.

Documents in this category are created and revised in collaboration with operationally affected parties and, as needed with appropriate working groups and task forces.

*This document is controlled when viewed electronically.
When downloaded or printed, this document becomes UNCONTROLLED.*

	Reliability Coordinator Procedure	Procedure No.	RC0550
		Version No.	1.3
		Effective Date	4/01/24
Reliability Coordinator Procedure Development, Maintenance and Distribution		Distribution Restriction: None	

Unless otherwise stated, the effective date of an IROL will coincide with the effective date of the Operating Guide.¹

Interim Operating Procedures and Temporary Operating Guides

These documents are published in a “fast track” manner in order to address an urgent unplanned operational need driven by NERC Alerts or other regulatory mandates, or an urgent operational need with reliability impacts. The RC Oversight Committee, operationally affected parties and appropriate working groups are notified.

Unless otherwise stated, the effective date of an IROL will coincide with the effective date of the Temporary Operating Guide.²

When issued, interim and temporary documents will have targeted sunset dates and should not be operated to any longer than necessary. RC West will collaborate with the appropriate working groups and/or operationally affected parties to review and manage further revisions through the normal process. RC West will provide progress updates to the RC Oversight Committee as needed.

3.2. Review Guidance

RC West, Working Groups and Operationally Affected Parties consider the following guidelines when reviewing an RC document:

- **Verify** accuracy of content by discussing with operators and/or other roles involved in the process.
- **Consider** sensitivity of the information in the document and whether appropriate distribution restrictions have been applied.
 - If needed, **consider** maintaining sensitive information in separate attachments so that the remainder of an RC document can be made public.
- **Determine** if any policy, regulatory, software or BES changes have occurred since the last review, which might affect the document, and **revise** accordingly.
- **Consult** other working groups or subject matter experts as needed for clarification.
- **Verify** all cross-references to other procedures are accurate.
- **Verify** that included graphics or other artifacts are useful, accurate, and presented in a usable manner.
- **Ensure** version history table includes a description of changes.

	Reliability Coordinator Procedure	Procedure No. RC0550
		Version No. 1.3
		Effective Date 4/01/24
Reliability Coordinator Procedure Development, Maintenance and Distribution		Distribution Restriction: None

3.3. Style and Format

RC West and CAISO Procedure Control Desk consider the following guidelines to ensure consistent style and formatting is applied to RC documents:

- When used in context of actions or steps, **bold** verbs to highlight and clarify what needs to be done
- **Use** italics for *notes* and **bold** the word **Note**.
 - Example: **Note:** *this is more information, and although it is not an action, it is still useful for the reader.*
- **Avoid** overuse of highlighting, **bolding**, underlining, *italics*, ALL CAPS or other formats which might confuse or distract the reader.
- When using abbreviations and/or acronyms, **spell** out the word the first time it is used, followed by the abbreviation or acronym in parenthesis.
- **Highlight** all changes throughout the document in yellow to aid the reader in easily detecting changes.

Note: *if a document or a section has been completely rewritten, and the highlighting becomes excessive, then do not use yellow highlighting. Include a statement in Version History, which indicates “major re-write, yellow highlighting not used.”*

- **Update** the table of contents and quality check the outline of the document.
- **Summarize** changes in the Version History section and ensure the revision date matches the Effective Date in the document header.
- **Maintain** a record of Oversight Committee approvals in the Version History.

3.4. Internal CAISO Review of RC Documents

Take the following actions to internally review RC document changes:

- **Evaluate** scope of review needed:
 - Minor changes – route to applicable RC West Leads and/or Managers
 - Major changes – route to applicable RC West Leads and/or Managers and Directors
 - Periodic review – route to RC West content owner

Note: *if an RC document change needs to be release immediately and cannot wait for full review, then consult with management to determine if partial review is acceptable, and/or if the RC document can be released as “Interim – Pending Final Approval”.*

*This document is controlled when viewed electronically.
When downloaded or printed, this document becomes UNCONTROLLED.*

	Reliability Coordinator Procedure	Procedure No.	RC0550
		Version No.	1.3
		Effective Date	4/01/24
Reliability Coordinator Procedure Development, Maintenance and Distribution		Distribution Restriction: None	

3.5. External Review of RC Documents

In accordance with the RC Oversight Committee Charter, RC West shall facilitate reviews of new and revised RC documents with the appropriate working groups and operationally affected parties.

RC West presents revisions as minor changes if there are no policy, process or software impacts. Minor changes are generally aesthetic or help provide clarity. Working groups, operationally affected parties and the RC Oversight Committee can provide feedback regarding minor changes and shall inform RC West if they do not agree that the presented revisions are minor in nature.

RC West facilitates discussions, impact analysis and review periods with the appropriate working groups and operationally affected parties for major changes which could potentially result in changes to methodologies, processes, software and/or operating plans.

RC West will generally post redlined draft documents for review to aid the reader in easily detecting changes. If a redline version is not posted, interested parties can contact the RC West lead for that specific effort and/or email jsorc@caiso.com.

If operationally affected parties include parties which are unable to participate in the normal RC working group sessions, such as Generator Owners, Generator Operators, Transmission Owners or Distribution Providers, then RC West will facilitate a public outreach process to provide opportunities for review and feedback. As appropriate RC West will post draft RC documents to its public website so these parties can access the content.

3.6. RC Document Deployment and Distribution

RC West maintains copies of its currently effective RC documents versions in locations accessible to CAISO personnel. In accordance with CAISO Tariff Section 22.11, RC West provides public access to RC documents whenever possible. RC West documents which do not contain information that is 1) system or security sensitive (i.e. Critical Energy Infrastructure Information) or 2) third party proprietary information, are posted on the CAISO Internet Website www.caiso.com.

RC documents which contain sensitive or proprietary information have distribution restrictions and access is limited to operationally affected parties. These documents are posted on the secure RC Portal site and/or distributed via email to operationally affected parties which do not have access to the secure site. Distribution is limited to identified operationally affected parties.

Note: Consideration is given to the segmentation of sensitive information into separate attachments so that the remainder of an RC document can be made public.

	Reliability Coordinator Procedure	Procedure No. RC0550
		Version No. 1.3
		Effective Date 4/01/24
Reliability Coordinator Procedure Development, Maintenance and Distribution		Distribution Restriction: None

The RC West documents posted on the public website www.caiso.com and the secure RC Portal site shall be considered the official effective versions and indicate the version numbers and the effective dates.

CAISO Procedure Control Desk ensures the public and operationally affected parties are notified when new or revised RC documents are published. This includes operating plans which have been implemented through Operating Guides.

- Public notifications are issued via Daily Briefings and operationally affected parties are responsible for maintaining their subscriptions to these notices.
- Operationally affected parties with access to [the secure RC Portal site](#) are notified via email and the “Notices” page.
- Each Balancing Authority and Transmission Operator in the RC West area is responsible for maintaining their procedure desk contacts on [the secure RC Portal site](#).
- Interested individuals may also subscribe to library or document level notifications.

RC West proactively works with the CAISO Procedure Control Desk to disseminate identified IROLs and supporting information prior to the effective date(s). Distribution will include the Transmission Operators, Transmission Planners, Transmission Service Providers and Planning Coordinators of entities affected by an IROL.³ RC West will not provide notifications or attestations to non-affected entities.

If an entity believes that they are operationally affected by a distribution restricted RC document, submit a written request via CIDI (Customer Inquiry, Dispute and Information system) or an email to isorc@caiso.com identifying:

- Specific document being requested,
- Name of requesting entity(ies) as well as the names and positions of the individuals that need access,
- Business justification which supports why the entity is an operationally affected party,
- Confirmation that each individual does not perform a merchant function on behalf of the requesting entity.

RC West reviews requests for access to restricted RC documents with appropriate personnel and operationally affected parties.

- RC West will provide a response to the requestor within ten (10) business days. The response will indicate whether it is still under review, or if access has been approved or denied.

³ FAC-014-3 R5 and 5.1

	Reliability Coordinator Procedure	Procedure No.	RC0550
		Version No.	1.3
		Effective Date	4/01/24
Reliability Coordinator Procedure Development, Maintenance and Distribution		Distribution Restriction: None	

- If access is provided, RC West may propose conditions or controls such as a non-disclosure agreement, extracted or redacted content, revisions to the RC document, or other appropriate means.
- If it is determined that the requesting entity is operationally affected, then access will be provided within thirty (30) days of the written request, subject to agreed-upon controls.

The RC West will not distribute documents provided to RC West by other entities to third parties. If third parties desire documents not owned by RC West, then the document owner should be contacted directly by the requesting party.

4. Supporting Information

Operationally Affected Parties

Publicly posted at www.caiso.com > Rules > Operating Procedures.

Definitions

The following terms capitalized in this Operating Procedure are in accordance with the NERC Glossary, and/or otherwise when used are as defined below:

Operationally Affected Parties	Entities that are operationally affected by implementation of, or proposed changes to, a CAISO Reliability Coordinator operating procedure, methodology or operating guide. An entity is "operationally affected" if the implementation of, or proposed changes to, would require a change in the operation of that entity's processes, procedures and/or facilities. In the context of RC West documents, operationally affected parties will generally include impacted Balancing Authorities, Transmission Operators, Transmission Planners, Transmission Service Providers and Planning Coordinators and/or Adjacent Reliability Coordinators.
