SCE has reviewed the CAISO's Straw proposal titled, Approval of Transmission Elements Under \$50 Million. SCE also participated in the CAISO's stakeholder meeting on this proposal on June 7, 2012. SCE also understands that the CAISO plans to post its final draft proposal on June 18 and stakeholders will have a chance to comment on July 2.

In order to further assess any potential concerns with the proposal, SCE would appreciate the CAISO addressing in more detail how the stakeholder process will work for projects that the CAISO is considering to approve that are under \$50 million and on an accelerated timeline in advance of the TPP approval. SCE also understands from the description on page 7 of the Straw that there will be an opportunity for stakeholders to comment before presenting the identified element to management for approval, SCE is interested in better understanding this process and how the CAISO plans to address stakeholder comments provided during that process.

SCE appreciates the opportunity to participate in this stakeholder process and looks forward to working with the CAISO on its final draft proposal.
