

SIBR WebSDK Upgrade User Reference

January 2021

California ISO © 2020 REV 1/11/21

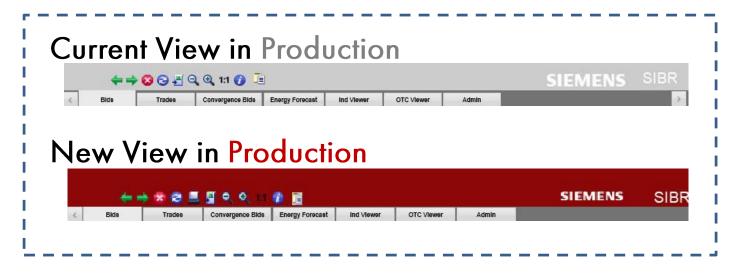

Scheduling Infrastructure Business Rules (SIBR) Upgrade

- SIBR Upgrade to latest version of WebSDK
 - No significant changes to overall functionality or processes
 - Banner color change for Production
 - Support model Internet Explorer
 - Compatibility settings

- Changes are currently available for view in MAP Stage
- Production changes become visible Tuesday, January 11, 2021

New Look – EIM Banners – Previous Change

Production banner to be **RED** instead of **GRAY** to be consistent with other CAISO live applications

View in MAP Stage Remains the Same

With update, display allows for clicking directly on the icon to receive both the bid status and bid messages in the same UI rather than opening a separate one.

New Look – EIM Column Sorting

Sorting functionality in the new version allows for greater data display granularity

Support Model

Internet Explorer is the browser supported by the CAISO

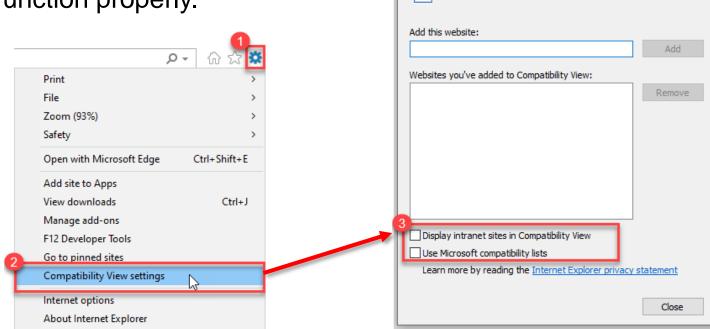

Though this application may still be used in Chrome and Edge, the primary supported browser is Internet Explorer, therefore defects will ONLY be validated for those identified in Internet Explorer.

Basic Display Layout

Note for IE11 Users, all compatibility features must be turned off in order to for the displays to function properly.

- In IE, select 'Tools' and then select 'Compatibility View Settings'
- Remove any URL and deselect all options.
