WEIM benefits and market update

Guillermo Bautista Alderete
Director – Market Analysis and Forecasting

Board of Governors Meeting
Information Only
December 7, 2022
$526.51 million gross economic benefits in Q3 2022

Gross economic benefits driven by:

- Participation of additional EIM entities
- Relative high energy prices
- Economic transfers among areas
WEIM helps reduce curtailments

Avoided curtailments since 2015 represent a reduction of 781 equivalent Tons CO₂
Robust volume of WEIM transfers among areas in Q3

* The smallest volumes of transfers are not depicted for clarity in the illustration.
On average net WEIM transfers in Q3 track solar production
Bilateral prices for Mid-C and Paloverde were much higher than WEIM prices.
