

# California ISO market update

**Eric Hildebrandt**

**Executive Director**

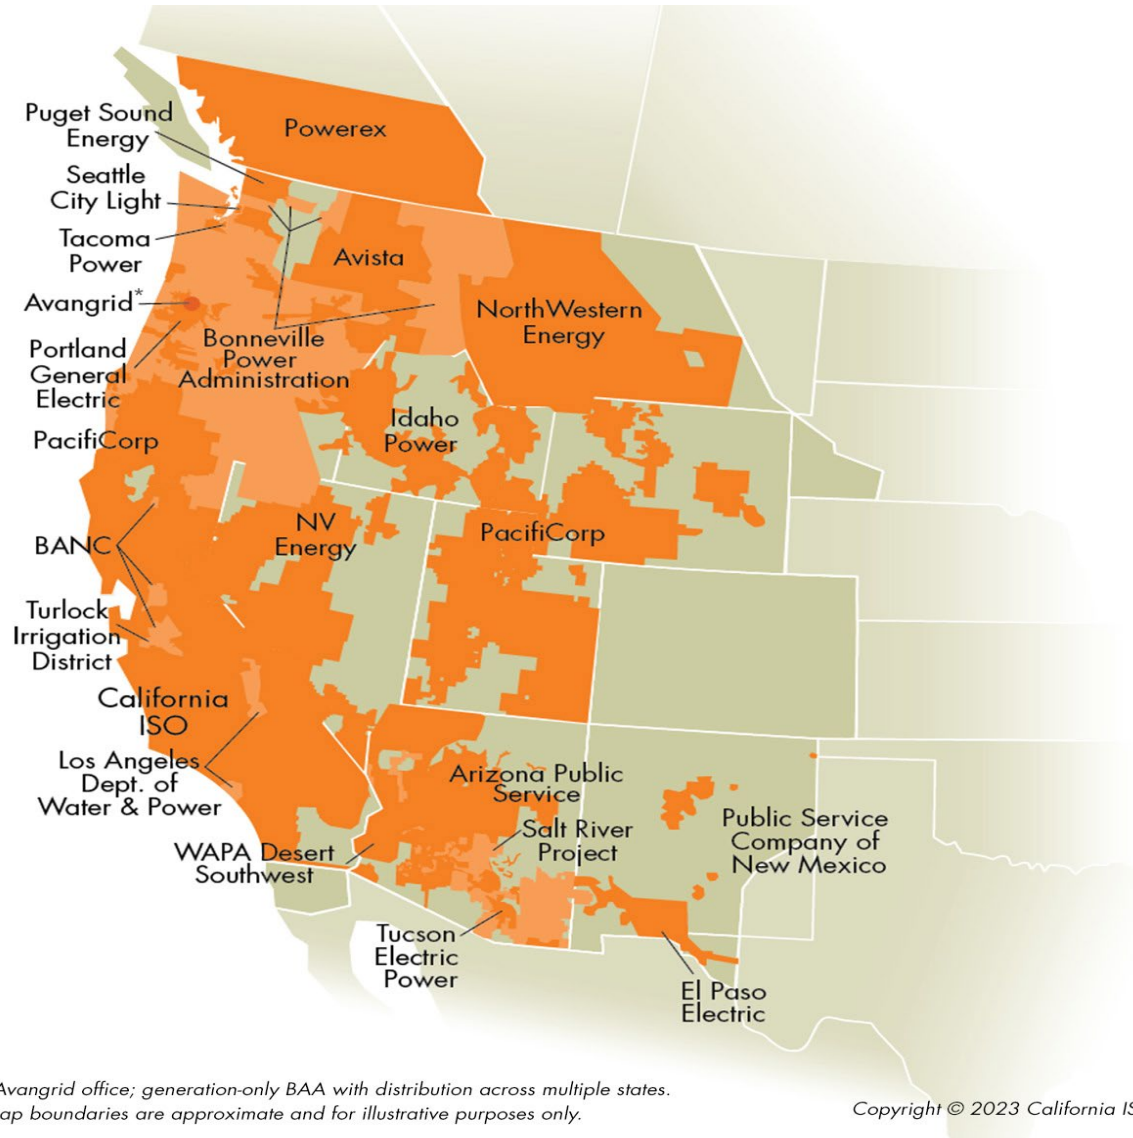

**Department of Market Monitoring**

**Energy Intermarket Surveillance Group**

**Cebu, Philippines**

**April 15-16, 2024**

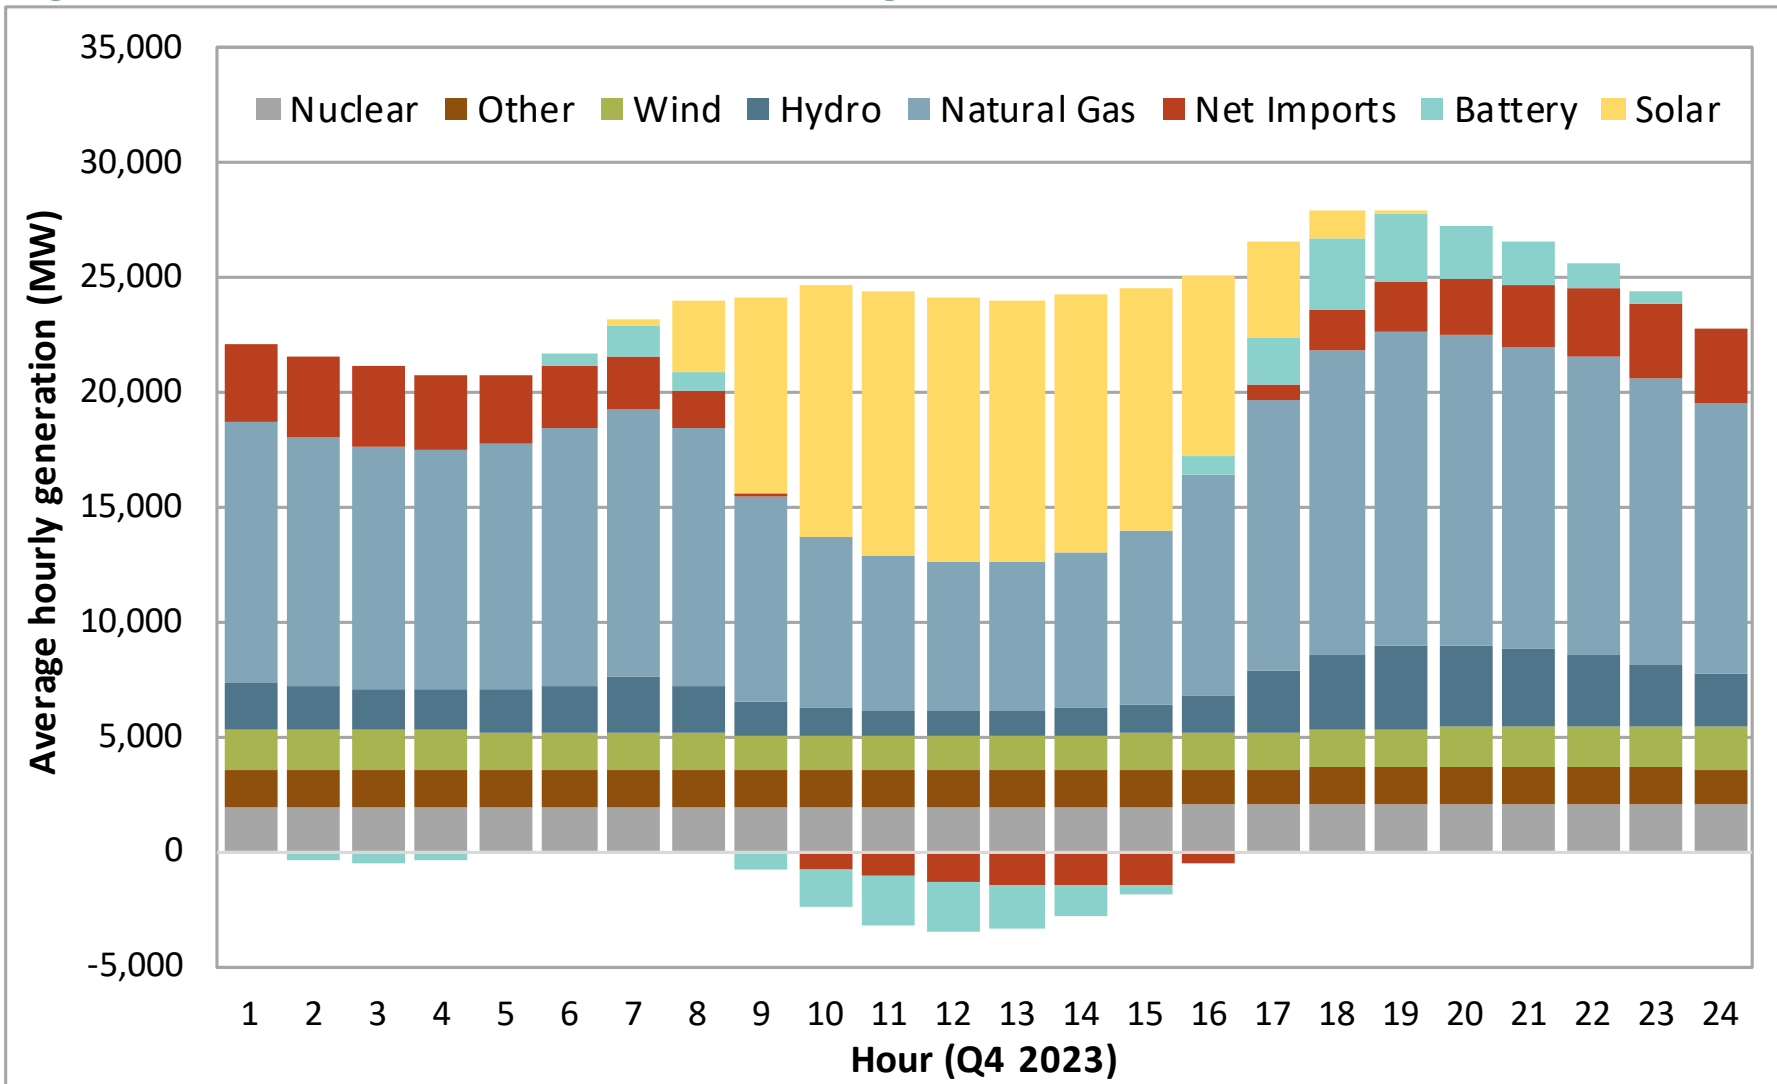

# California ISO and Western Energy Imbalance Market (WEIM)

## Key trends

- Continuing growth of solar
- Battery storage increasing rapidly
- Increased regional transfers
- Excess solar during mid-day hours being used to support battery charging and net exports from California

# Excess solar in California during mid-day hours being used to support battery charging and net exports to rest of regional market

# Market prices are now lowest during peak solar mid-day hours
