FERC FINANCIAL REPORT FERC FORM No. 1: Annual Report of Major Electric Utilities, Licensees and Others and Supplemental Form 3-Q: Quarterly Financial Report

These reports are mandatory under the Federal Power Act, Sections 3, 4(a), 304 and 309, and 18 CFR 141.1 and 141.400. Failure to report may result in criminal fines, civil penalties and other sanctions as provided by law. The Federal Energy Regulatory Commission does not consider these reports to be of confidential nature

Exact Legal Name of Respondent (Company)

California Independent System Operator Corporation

Year/Period of Report

End of <u>2010/Q4</u>

Report of Independent Auditors

To the Members of the Board of Governors California Independent System Operator Corporation:

We have audited the accompanying balance sheets of the California Independent System Operator Corporation ("the Company") as of December 31, 2010 and 2009, and the related statements of income, retained earnings and cash flows for the years then ended, included on pages 110 through 123.14 and page 450.2 of the accompanying Federal Energy Regulatory Commission Form 1. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As described in Note 2, these financial statements were prepared in accordance with the accounting requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases, which is a comprehensive basis of accounting other than generally accepted accounting principles in the United States of America.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2010 and 2009, and the results of its operations and its cash flows for the years then ended in accordance with the accounting requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases.

This report is intended solely for the information and use of the Members of the Board of Governors and management of the California Independent System Operator Corporation and for filing with the Federal Energy Regulatory Commission and should not be used for any other purpose.

NOTES TO FINANCIAL STATEMENTS (Continued)				

1. Organization and Operations

The Company, a nonprofit public benefit corporation incorporated in May 1997, is responsible for the operation of the long-distance, high-voltage power lines that deliver electricity throughout the California grid and to neighboring control areas and states, as well as with Canada and Mexico. The Company charges a Grid Management Charge (GMC) to market participants to recover the Company's costs and to provide an operating reserve. The Company's principal objective is to ensure the reliability of the California grid while fostering a low-cost wholesale marketplace for electrical generation and related services in California. The Company operates pursuant to tariffs filed with the Federal Energy Regulatory Commission (FERC).

The Company operates a day-ahead market for all 24 hours of the next operating day, and a realtime market for each operating hour. The Company also performs a settlement and clearing function by collecting payments from users of these services and making pass-through payments to providers of such services. Cash held by the Company on behalf of market participants is recorded in a restricted asset account with a corresponding liability due market participants on the balance sheet. Except as noted above, market transactions are maintained in financial records separate from the Company, and accordingly, the financial results of these market transactions are not included in the financial statements of the Company. GMC revenues have a priority claim against any market-related receipts. Any market defaults are allocated to market participants.

The Board of the Company is appointed by the California Governor and is subject to confirmation by the California State Senate. A full Board is comprised of five members.

NOTES TO FINANCIAL STATEMENTS (Continued)				

2. Summary of Significant Accounting Policies

Method of accounting

The accompanying financial statements have been prepared in conformity with the requirements of the FERC, as set forth in its applicable Uniform System of Accounts and published accounting releases. Accordingly, as required by the FERC, certain information has been presented differently or has been excluded from that which would be required by accounting principles generally accepted in the United States of America (GAAP). Such differences include expense recongition related to the post-employment medical benefit plan, accounting for certain investments, the classification of long-term debt, balance sheet captions used for certain assets and liabilities, and the presentation of cash flows, as specified by FERC. Additionally, certain disclosures required by GAAP are not required to be presented by the FERC.

Use of estimates

The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. In particular, the Company's results of operations and financial position are materially affected by the management estimates associated with generator noncompliance fines, as discussed in Note 7. Actual results could materially differ from these, and other, estimates.

Utility plant

Fixed assets are recorded at cost. Depreciation is computed on the straight-line method over the assets' estimated useful lives. Most of the Company's investment in fixed assets consists of the newly-constructed building which is depreciable over a forty year life, and information systems, which are being depreciated over useful lives of three to five years. The cost of improvements to or replacement of fixed assets is capitalized. Interest incurred during development is capitalized. When assets are retired or otherwise disposed of, the cost and related depreciation are removed from the accounts and any resulting gain or loss is reflected in the Company's statement of income for the period. Repairs and maintenance costs are expensed when incurred. The Company capitalizes direct costs of salaries and certain indirect costs incurred to develop or obtain software for internal use. Costs incurred related to software development during the preliminary project stage and training and maintenance costs are expensed as incurred. Costs of software development related to abandoned projects are expensed when the decision to abandon is made.

Cash and cash equivalents

Cash and cash equivalents are included in various funds whose use is either unrestricted or restricted. Cash and cash equivalents are comprised of cash on hand, governmental securities, commercial paper, money market investments, mutual funds and certificates of deposit and other highly liquid investments with original maturities of three months or less. Cash and cash equivalents are unrestricted unless specifically restricted by bond indentures or the tariff.

Other property and investments

Other property and investments include other investments and other special funds. Other investments include government and federal agency securities and corporate bonds, with maturities of more than three months. Investments are carried at fair value. Income on investments and the gain or loss from the mark-to-market on investments are recorded as a component of interest income.

Other special funds include cash and cash equivalents restricted by the tariff for market participants, bond indenture agreements, for capital expenditures, funds held in trust for employee retirement plans and amounts on deposit for generator interconnection studies.

Current and accrued assets

Current and accrued assets include cash on hand, special deposits, customer accounts receivable, other accounts

California Independent System Operator Corporation	(2) _ A Resubmission	05/12/0011	2010/Q4	
NOTES TO FINANCIAL STATEMENTS (Continued)				

receivable, prepayments, interest and dividends receivable, and accrued utility revenues.

Special deposits include cash, cash equivalents and investments restricted for debt service that are held by a bond trustee under an indenture agreement for scheduled repayments of bond principal and for a debt service reserve fund. Investments, which include government and federal agency securities, corporate bonds, a guaranteed investment contracts (GIC) and a forward delivery agreement are carried at fair value.

Accrued utility revenues and revenue recognition

The GMC is based on rates filed with FERC and is designed to recover the Company's operating costs, capital expenditures, debt service costs, and to provide for an operating reserve. The GMC and other market service billings are recognized as revenue, based on estimated meter data submitted by market participants and therefore, may be subject to adjustment after final invoices have been issued.

The 2010 and 2009 GMC rates were comprised of the following service categories: core reliability services; energy transmission services; forward scheduling; congestion management; market usage; and settlements, metering and client relations.

The operating reserve is calculated separately for each GMC service category and accumulates until the reserve becomes fully funded (at 15 percent of budgeted annual operating costs for each rate service category). At December 31, 2010, the operating reserve for each service category was fully funded. In accordance with the tariff, any surplus operating reserve balance is applied as a reduction in revenue requirements in the following year. The tariff requires GMC rates to be adjusted not more than once per quarter in the event that billing determinant volumes differ by more than five percent from those projections used to set rates. During 2010 and 2009, adjustments were made to certain GMC rates pursuant to these provisions.

Generator interconnection studies

The Company is responsible for conducting generator interconnection studies. The project sponsors are the owners of the generating plants that are planning to be connected to the California grid. The project sponsors request the Company to conduct these studies and are required to make a deposit before any studies are performed. At any time, the project sponsors may withdraw from the studies and have the right to some or all of the remaining unapplied deposits.

In accordance with the tariff, the Company charges the project sponsors the actual costs of the studies. Study costs include both internal and external costs and are recorded when incurred as operating expenses. As costs are incurred, the Company recognizes revenue for the same amount, which is recorded as a component of operating revenues. The Company applies the deposits against the related receivable once the studies are completed. Beginning in 2010, the tariff rules regarding deposits changed to require that certain deposits related to projects abandoned by the project sponsor be retained by the Company and distributed to market participants following FERC approval.

Deferred debits

Deferred debits consist primarily of debt issuance costs, which are amortized over the life of the bonds using the bonds outstanding method, which approximates the effective interest method.

Other deferred credits

Other deferred credits consist primarily of generator noncompliance fines and other long-term liabilities.

From December 8, 2000 through June 30, 2001, the Company assessed noncompliance fines on participating generators that failed to fully comply with dispatch instructions when the Company was seeking to prevent an imminent or threatened system emergency. In accordance with the tariff, these fines are retained by the Company. The Company recorded the net realizable amount of such fines as revenue when the underlying noncompliance event occurred, and adjusts such amounts in recognition of evolving factors affecting the ultimate recognition of the fines charged and to reflect payments of the liability.

Name of Respondent	This Report is:	Date of Report	Year/Period of Report	
·	(1) X An Original	(Mo, Da, Yr)	•	
California Independent System Operator Corporation	(2) _ A Resubmission	05/12/0011	2010/Q4	
NOTES TO FINANCIAL STATEMENTS (Continued)				

Income taxes

The Company is exempt from federal income tax under Section 501(c)(3) of the U.S. Internal Revenue Service (IRS) Code and is exempt from California State franchise income taxes.

Concentration of credit risk

Financial instruments that subject the Company to credit risk consist primarily of accounts receivable relating to GMC billings due from market participants and cash and cash equivalents and investments.

All of the Company's receivables are due from entities in the energy industry, comprising utilities, generation owners, and other electricity market participants. For the years ended December 31, 2010 and 2009, approximately 58 percent and 62 percent, respectively, of GMC revenues were from two market participants.

GMC revenues have a priority claim against any market-related receipts, which means that if an entity defaults on an invoice containing a GMC charge, the Company receives the full GMC so long as sufficient funds were received on other market invoices.

The Company's concentration of credit risk related to its investment portfolio is the risk attributed to the magnitude of investments in a single issuer. At December 31, 2010 and 2009, the Company had 67% and 69% of its investment portfolio concentrated in 6 issuers.

Subsequent events

The Company evaluates events or transactions that occur after the balance sheet date but before financial statements are issued for potential recognition or disclosure in the financial statements. The Company has evaluated all subsequent events through May 12, 2011, the date the financial statements were issued, and no items were noted that need to be disclosed.

NOTES TO FINANCIAL STATEMENTS (Continued)				

3. Customer Deposits

Customer deposits, which are held by the Company to be remitted to market participants or others on their behalf, consist of the following at December 31 (in thousands):

	2010	2009
Security deposits	\$ 141,746	\$ 124,743
Market funds pending settlement	67,704	69,079
Pass-through fees due to others	10,341	10,195
Generator interconnection study deposits	59,830	58,082
Forfeited deposits pending distribution	12,547	-
Total amounts restricted for market participants	\$ 292,168	\$ 262,099

Cash and cash equivalents restricted for market participants consist of amounts held by the Company to be remitted to market participants or others on their behalf. Security deposits are amounts received from market participants who are required to post collateral for their transactions in the Company's markets. Market funds pending settlement consist of amounts collected during the settlement and clearing function that will pass through to market participants in subsequent periods. A portion of the market funds pending settlement (\$1.3 million and \$18.2 million at December 31, 2010 and 2009) is being held pending resolution of the FERC Refund Case (Note 12). Pass-through fees due to others consist of amounts collected from market participants that will be paid to market participants for summer reliability, startup costs and emission costs. Generator interconnection study deposits are amounts collected for future studies. Forfeited deposits consist of generator interconnection study amounts forfeited by project sponsors that are pending Federal Energy Regulatory Commission approval for distribution.

These amounts are reflected in the balance sheet as Customer Deposits, a liability, and as a component of Other Special Funds, an asset.

5. Utility Plant

Utility Plant consists of the following at December 31 (in thousands):

	2010	2009
Nondepreciable fixed assets:		
Land	\$ 7,617	\$ 7,617
Work-in-progress	110,946	76,438
	118,563	84,055
Depreciable fixed assets:		
Grid, market and settlement software	313,140	300,412
Enterprise and support software	23,693	32,139
Computer hardware and other equipment	44,092	31,567
HQ Facility - Mission Critical wing	45,631	-
Leasehold improvements	17,675	17,488
Furniture, fixtures and other	13,263	10,657
	457,494	392,263
Less: accumulated depreciation	(224,784)	(186,546)
	232,710	205,717
Total fixed assets, net	\$ 351,273	\$ 289,772

The Company capitalized interest related to the development of fixed assets of \$7.6 million and \$4.4 million for the years ending December 31, 2010 and 2009, respectively. The 2010 and 2009 amounts include a reduction of \$3.9 million and \$1.1 million, respectively for income earned on unspent debt proceeds.

On September 30, 2010, the mission critical wing of the new headquarters facility was completed and subsequently occupied. As a result, \$45.6 million in assets were moved from work-in-progress and placed in service. Included in work-in-progress at December 31, 2010, is the cost of the remaining two wings of the new headquarters facility in the amount of \$84.8 million.

On April 1, 2009, the new market system was placed into operation and as a result, \$198.6 million of assets were moved from work-in-progress and placed in service.

For the year ended December 31, 2009, the Company recorded \$6.4 million in abandonment and loss on retirement expenses. The assets that were abandoned in 2009 were software and hardware that were used in running the markets and certain assets related to the new headquarters building. As the new market was being implemented in 2009, the Company determined that certain software and hardware components were not performing as expected and made the decision to abandon the assets and replace them. Additionally, the costs associated with earlier design studies for the new headquarters building were abandoned as these designs were not aligned with the Company's current environmental strategy.

6. Employee Note Receivable

The Company has provided \$500,000 in financing to an officer of the Company in connection with the purchase of his primary residence. The loan is collateralized by a subordinated deed of trust on the property, accrues interest at 6.5 percent per annum, compounded annually, and requires annual payments of \$68,000. Portions of the note may be forgiven by the Company based on the officer's continuing employment as set forth in the employment agreement. The balance due at December 31, 2010 and 2009 of approximately \$390,000 and \$434,000, respectively, including accrued interest, is included in other accounts receivable in the accompanying balance sheets.

	(1) X An Original	(Mo, Da, Yr)	·	
California Independent System Operator Corporation	(2) _ A Resubmission	05/12/0011	2010/Q4	
NOTES TO FINANCIAL STATEMENTS (Continued)				

7. Generator Noncompliance Fines

In 2000 and 2001, the Company billed generator noncompliance fines to market participants totaling \$122.1 million. Through December 31, 2009, collection of these fines totaled \$60.7 million. Generally, these fines were assessed at twice the highest price paid in the Company's markets for energy and were applied against the amount of energy the participating generator failed to supply as directed by the Company during specific emergency conditions as defined in the tariff. These fines will be retroactively adjusted as a result of the FERC Refund Case, as described in Note 12, in which the prices used to calculate the fines are subject to adjustment, with any surplus collections being refunded with interest to market participants.

Based on estimates of the mitigated energy prices in the FERC Refund Case, the Company recorded fine revenues totaling \$29.5 million, which results in a refund liability of \$31.2 million. The ultimate settlement of fines is expected after the conclusion of the proceedings in the FERC Refund Case and the ultimate financial settlement of the California Power Exchange (Cal PX).

In accordance with FERC rulings, the Company accrues interest on the portion of fines collected in excess of the estimated realizable amount, which are to be refunded to market participants when the amounts are settled. Such interest expense amounted to \$1.9 million and \$2.1 million in 2010 and 2009, respectively.

Through December 31, 2008, the Company excluded the calculation of interest on the preparatory rerun corrections, based on the position that interest would only accrue upon the preparatory rerun being invoiced. The Company, however, believed that preparatory rerun corrections should be eligible for interest from the due date of the original trade month being corrected in the same manner as interest on corrections for mitigated market-clearing prices in the refund rerun and requested a FERC ruling on this issue. On May 27, 2009, FERC ruled that preparatory rerun corrections in the FERC Refund Case are eligible for interest in the same manner as interest on corrections for mitigated market-clearing prices in the refund rerun. Such interest amounted to \$12.7 million at the date of FERC's ruling, of which \$12.2 million relates to amounts that accumulated through December 31, 2008. Accordingly, in May 2009, the Company recognized \$12.8 million as a reduction of interest expense with a corresponding adjustment to the estimated generator noncompliance fines refund liability.

In 2010, the Company determined an additional adjustment was necessary to comply with the Federal Energy Regulatory Commission refund order and to reverse the mitigation of certain energy sales. The effect of this adjustment was an increase in generator non-compliance fine revenue of \$1.4 million, which is recorded as operating revenues, and a reduction in interest previously accrued of \$0.9 million, which is recorded as a component of interest expense.

Also in 2010, in connection with a FERC settlement, the Company made arrangements to distribute the generator noncompliance fines to be refunded to the market in conjunction with the Sempra Energy Trading global settlement. The settlement was approved by FERC on December 22, 2010, and on December 30, 2010, the Company distributed \$43.9 million to the settling parties. The Company estimates the remaining liability (including interest) related to generator noncompliance fines, after the payment described above and after other adjustments to be \$0.8 million as of December 31, 2010 and is recorded as a component of other deferred credits. The final settlement of fines is expected after the conclusion of the proceedings in the FERC Refund Case and the related financial settlement of the Cal PX bankruptcy.

While there are significant uncertainties associated with this process, management believes it is unlikely that there will be any material future adjustment in generator fines to be recognized by the Company.

8. Bonds

Bonds consist of the following at December 31 (in thousands):

	2010	2009
CIEDB Revenue Bonds, Series 2009		
Fixed interest rates of 3.00% - 6.25% with maturities		
from 2012 through 2039	\$ 200,000	\$ 200,000
CIEDB Revenue Bonds, Series 2008		
Fixed interest rates of 4.00% - 5.00% with maturities		
through 2014	126,870	165,970
Unamortized net premium:		
Series 2009 bonds	1,852	1,955
Series 2008 bonds	2,805	4,854
Total long-term debt	\$ 331,527	\$ 372,779

Scheduled future debt service payments as of December 31, 2010, are as follows (in thousands):

	Principal	Interest	Total	
2011	42,250	16,607	58,857	
2012	28,585	14,870	43,455	
2013	39,580	13,228	52,808	
2014	27,145	11,605	38,750	
2015	3,830	10,868	14,698	
2016 - 2039	185,480	163,664	349,144	
	\$ 326,870	\$ 230,842	\$ 557,712	

Long-term debt and related agreements

In July 2009, the Company issued \$200.0 million of fixed rate revenue bonds (the 2009 Bonds) through the California Infrastruture and Economic Development Bank (CIEDB), at a premium of \$2.0 million. The proceeds of the issuance were used to provide funds for the design and construction of a new headquarters building, the acquisition or development of computer hardware and software systems, and the acquisition of office equipment.

The 2009 and 2008 Bonds are supported by a pledge of the Company's revenues and operating reserves. In addition, the 2009 Bonds are supported by a deed of trust on the new headquarters building and land. The premiums on the bonds are being amortized over the life of the bonds.

Interest expense

Interest expense recorded by the Company related to long-term debt includes interest paid on the bonds, and amortization of the bond issuance costs, loss on refunding and the bond premiums.

NOTES TO FINANCIAL STATEMENTS (Continued)					

9. Fair Value of Financial Instruments

Accounting Standards Codification (ASC) 820 establishes a three-tier fair value hierarchy that prioritizes inputs to valuation techniques used for fair value measurements. This accounting standard is applied under other accounting pronouncements that require or permit fair value measurements and, accordingly, does not require any new fair value measurements.

The levels of fair value input hierarchy are described below:

- Level 1: Quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.
- Level 2: Quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets.
- Level 3: Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the asset or liability. Financial assets and liabilities are classified in their entirety based on the level of input that is considered most significant to the fair value measurement.

The Company's financial assets and liabilities recorded at fair value on a recurring basis are bonds (government, agency and corporate), a guaranteed investment contract (GIC), a forward delivery agreement (FDA), money market funds, and investments held in employee retirement plan trust accounts. The Company utilizes the market approach to measure fair value for all of these assets, except for the GICs and FDA, which uses the income approach. The Company's assets and liabilities measured at fair value on a recurring basis at December 31, 2010, were as follows (in thousands):

	Total	Level 1	Level 2	Level 3
Bonds	\$ 121,538	\$ -	\$ 121,538	\$ -
GICs and Forward delivery agreements	36,212	-	-	36,212
Employee retirement plan trust accounts	1,455	1,455	-	-
Money market funds	382,691	382,691	-	-

The Company's assets and liabilities measured at fair value on a recurring basis at December 31, 2009, were as follows (in thousands):

	Total	Level 1	Level 2	Level 3
Bonds	\$ 172,145	\$ -	\$ 172,145	\$ -
GICs and Forward delivery agreements	34,817	-	-	34,817
Employee retirement plan trust accounts	1,233	1,233	-	-
Money market funds	443,398	443,398	-	-

The bonds, GICs, forward delivery agreements, employee retirement plan trust accounts, and money market funds

NOTES TO FINANCIAL STATEMENTS (Continued)					

are components of other investments, other special funds, special deposits, and cash on the balance sheet.

Changes in the value of the fair value measurments that are classified as Level 3 inputs during the year ended December 31, were as follows (in thousands):

	2010	2009
Balance as of January 1	\$ 34,817	\$ 20,598
Purchases	-	14,902
Unrealized gain (loss)	1,395	(683)
Balance as of December 31	\$ 36,212	\$ 34,817

The unrealized gain and loss relate to financial instruments still held by the Company at December 31, 2010 and 2009, respectively, and are recorded as a component of interest and dividend income on the statement of income.

The fair value of the Company's long-term debt as of December 31, 2010 and 2009 was \$340.1 million and \$382.4 million, respectively. The fair value of fixed rate long-term debt, which includes the short-term portion, is based on current market rates.

The carrying values reported on the balance sheet for current assets and liabilities, excluding amounts discussed above, approximate fair value.

Additionally, the Company had \$4.6 million and \$4.2 million at December 31, 2010 and 2009, respectively, in trust related to the post employment medical benefit plan (see Note 10). These trust assets consist primarily of corporate bonds and are classified as a Level 2 on the fair value hierarchy at both December 31, 2010 and 2009.

10. Employee Benefit Plans

The Company maintains a number of employee benefit plans. The description of the plans and their key provisions is reflected below. The plans are included in the accumulated provision for pensions and benefits on the balance sheets and consist of the following at December 31 (in thousands):

	2010	2009
Executive pension restoration plan	\$ 1,069	\$ 866
Post-employment medical benefit plan	14,275	12,668
Supplemental executive retirement plan	369	320
Executive savings plan	387	367
Total employee retirement plan obligations	\$ 16,100	\$ 14,221

Retirement savings benefits plan

The Company sponsors a defined contribution retirement plan, the California ISO Retirement Savings Benefits Plan (the Retirement Plan) that is subject to the provisions of the Employee Retirement Income Security Act of 1974 and substantially covers all employees. The Retirement Plan is administered by the Company with the assistance of a third party. The assets of the plan are held separately from Company assets and are not combined with the assets on the balance sheet.

Employees may elect to contribute up to fifty percent of their eligible compensation to the Retirement Plan, subject to statutory limitations. The Company matches contributions up to six percent of an employees' eligible compensation and an additional contribution equal to five percent of eligible compensation for employees with less than five years of service, or seven percent for employees who have at least five years but not more than ten years of service. An additional contribution of one percent of eligible compensation is also made by the Company for each five year increment of service after an employees' ten year anniversary.

Employees' contributions to the Retirement Plan for 2010 and 2009 were \$6.9 million and \$6.7 million, respectively. The Company's contributions to the Retirement Plan for 2010 and 2009 were \$7.7 million and \$7.8 million, respectively.

Executive pension restoration plan

The Company sponsors the Executive Pension Restoration Plan, a non-qualified defined contribution plan, which allows certain officers of the Company to make contributions and receive Company contributions in excess of the 401(k) contribution limits set forth by IRS regulations as described in the retirement savings benefits plan above.

The contributions and earnings thereon are held in a trust and the balances as of December 31, 2010 and 2009, were \$1,069,000 and \$866,000, respectively and are included in Other Special Funds with a corresponding liability in Accumulated Provision for Pensions and Benefits. The Company recognized expenses for contributions of \$135,000 and \$229,000 in 2010 and 2009, respectively.

Post-employment medical benefit plan

Plan description

The Company sponsors the California ISO Retiree Medical Plan, a defined benefit plan, to provide post-employment health care benefits to all employees who retire from the Company on or after attaining age 60 with at least five years of service and to their spouses, domestic partners and eligible dependents, as provided for under the terms of the plan. Depending on the retirement age and coverage elections made by the beneficiaries, the Company pays a portion (ranging from 60 to 100 percent) of the premiums. There are 31 employees and 18 retirees eligible to receive benefits pursuant to the plan as of December 31, 2010.

California Independent System Operator Corporation	(2) _ A Resubmission	05/12/0011	2010/Q4		
NOTES TO FINANCIAL STATEMENTS (Continued)					

Funding policy

The Company has established a trust for the purposes of funding the plan. The trust was established as a tax-exempt voluntary employees' beneficiary association. All assets of the trust are to be used for the exclusive benefit of the participants and beneficiaries of the plan. Although the Company has fiscal accountability for these assets and holds them in a fiduciary capacity, the assets are not considered assets of the Company and are therefore not included on the balance sheets of the Company. As of December 31, 2010 and 2009, the trust assets were \$4.6 million and \$4.2 million, respectively. Trust assets were primarily invested in corporate bonds. The investment of the trust assets generally follows the Company's investment policy.

The Company's current funding policy is to annually contribute an amount such that the total amount in the trust approximates the actuarially determined liability attributable to retirees and their spouses and to active participants who are fully eligible to retire.

This plan had the following activity and related accumulated post retirement benefit obligation (APBO) at December 31 (in thousands):

	2010			2009		
APBO, beginning of year	\$	16,805	\$	15,227		
Service cost		2,328		2,332		
Interest cost		997		904		
Plan participants' contributions		57		42		
Actuarial (gain)/loss		3,676		(1,598)		
Plan change		(4,823)		-		
Benefits paid and other		(157)		(102)		
APBO, end of year		18,883		16,805		
Less: fair value of plan assets		4,608		4,137		
Funded status and balance sheet liability	\$	14,275	\$	12,668		

The actuarial loss in 2010 was primarily due to demographic experience and assumption changes, and the investment return different from assumed during the prior year. The actuarial gain in 2009 was due to the actual 2009 health care cost trend rate being less than projected and other actual data experience compared to projected.

Plan changes, which were in effect January 1, 2010, contributed to a gain of \$4.8 million. The employee cost-share of the medical plan premiums increased from an approximate average of 30% to 40% for all insurance plans.

Additional pension liabilities are recorded as accumulated other comprehensive income in the proprietary capital section of the balance sheet, and to the post-retirement medical benefit plan liability in the balance sheet. In 2010, as a result of the actuarial loss and the gain from plan changes, the Company recorded a \$1.1 million reduction to the additional pension liability. In 2009, the Company recorded a \$1.9 million reduction to the additional pension liability, mostly as a result of the actuarial gain.

The significant assumptions that are considered in the calculation of the Accumulated Pension Benefit Obligation (APBO) include the discount rate applied to the estimated future health care benefits (5.5% and 6.00% at December 31, 2010 and 2009, respectively) and the estimated costs of the health care premiums to be paid on behalf of the plan beneficiaries. Such estimated costs are based on current premium levels increased by estimated health care cost trend rates over the projected term of the benefits. The health care cost trend rate assumptions used to estimate the actuarial liability as of December 31, 2010, were annual increases of 8.50% for 2010 and 5% on the year of the

NOTES TO FINANCIAL STATEMENTS (Continued)					

ultimate health care cost trend rate in 2018.

Assumed health care cost trend rates have a significant effect on the benefit obligation amounts reported for the health care plans. A one-percentage-point change in assumed health care cost trend rates would have the following effects (in thousands):

	1-Percentage Point Increase		1-Percentage Point Decrease	
Effect on total service and interest cost Effect on APBO	\$	807 4,031	\$	(622) (3,145)

A summary of the plan's postretirement benefit expense for 2010 and 2009 is as follows (in thousands):

	2010			2009		
Service cost	\$	2,328	\$	2,332		
Interest cost		997		904		
Expected return on assets		(219)		(141)		
Net loss/ (gain) amortization		18		145		
Net periodic benefit cost	\$	3,124	\$	3,240		

The following benefit payments, which reflect expected future health care benefit services, as appropriate, are expected to be paid in connection with the plan as of December 31, 2010 (in thousands):

2011	\$ 200
2012	292
2013	371
2014	468
2015	549
2016 - 2020	4,327

Supplemental executive retirement plan

The Company sponsors the California ISO Supplemental Executive Retirement Plan (SERP Plan), a non-qualified defined benefit plan intended to provide selected executives of the Company with target retirement benefits based upon an executive's average earnings and total number of years of service with the Company, as defined in the plan. The target benefit is to be offset by other retirement benefits, including those provided by the Company, and by any distributions from this plan made to pay the beneficiary's share of federal, state and local taxes. The plan is unfunded.

NOTES TO FINANCIAL STATEMENTS (Continued)								

The activity and related obligations associated with the plan during 2010 and 2009 is as follows (in thousands):

	2010			2009
Obligation, beginning of year	\$	320	\$	509
Current period actuarially determined cost		130		205
Benefits distributed during the year		(81)		(394)
Obligation, end of year	\$	369	\$	320

The Company recognized expenses of \$130,000 and \$205,000 in 2010 and 2009, respectively in connection with this plan.

Executive savings plan

The Company sponsors the Executive Savings Plan, a non-qualified defined contribution plan under section 457(b) of the IRS Code. The Company contributes a percentage of each officer's annual base compensation to the plan. Officers may elect to make voluntary contributions, subject to statutory limitations. The contributions and earnings thereon are held in a trust and the balance as of December 31, 2010 and 2009 was \$387,000 and \$367,000, respectively and is included in Other Special Funds, with a corresponding liability in Accumulated Provision for Pensions and Benefits. The Company recognized expenses of \$89,000 and \$92,000 in 2010 and 2009, respectively, in connection with this plan.

NOTES TO FINANCIAL STATEMENTS (Continued)								

11. Lease and Contract Commitments

The Company has long-term operating leases and service contracts that expire at various times through 2030 including telecommunication equipment and services, information system equipment and services and systems infrastructure. The following are the future minimum payments under these agreements as of December 31, 2010 (in thousands):

2011	\$ 12,487
2012	12,506
2013	3,318
2014	793
2015	809
2016 - 2030	4,183
	\$ 34,096

Lease and service contract costs of approximately \$12.6 million and \$12.2 million were charged to operating expense in 2010 and 2009, respectively.

The Company has leased office space under three separate leases, which served as the location of the headquarters prior to the move, in January 2011, to the newly constructed headquarters. One lease expires in November 2012, and the other 2 leases expire in December 2016, with an early termination option available beginning November 2012. Although the Company is no longer using the leased space, it is required to pay monthly rent through November 2012, early termination fees, and other on-going costs associated with each of the leases.

The Company will record an expense for the net unrecoverable lease and termination costs in 2011, the period in which the properties were vacated and were no longer being used in operations. The Company currently estimates its total future costs associated with the abandoned facilities to be \$5.9 million.

NOTES TO FINANCIAL STATEMENTS (Continued)									

12. Contingencies and Settlements

The FERC Refund Case

In 2000 and 2001, the California energy markets, including those managed by the Company, experienced high prices, shortages of energy and reserves, rolling blackouts and liquidity problems for many market participants. Several of them, including the California Power Exchange (Cal PX), filed for bankruptcy.

Purchasers of energy during this period sought refunds at FERC. FERC has issued a series of orders related to mitigating the market clearing prices in markets administered by the Company and Cal PX for the period from October 2, 2000 through June 20, 2001 (the FERC Refund Case). Several of the Company's market participants have settled their liability arising from the FERC Refund Case and related proceedings. Management believes the ultimate outcome of the FERC Refund case (except as it relates to generator noncompliance fines, as described in Note 7) will have no financial impact on the Company as these refund amounts are funded and will ultimately be resettled among market participants.

Market billing disputes in good faith negotiations

As part of the tariff and applicable contracts, the Company has dispute resolution processes for market participants, transmission owners and RMR owners to register disagreements regarding information reflected in the settlement statements or billing amounts for market and RMR activity. After good faith efforts, known as good faith negotiations (GFN), have been made to negotiate and resolve disputes, written claims may be submitted either to mediation or arbitration.

Two material unresolved market related dispute, totaling \$46.4 million (excluding interest) remains outstanding in GFN at December 31, 2010. These disputes are related to disagreements with the Company's financial settlement of market transactions and related tariff interpretations. Management believes that any settlements or market adjustments relating to these disputes would be resettled against the market with no liability to the Company.

Indemnifications

The Company's bylaws require its annual financial statements to include disclosures about certain payments made by the Company related to indemnifications to or on behalf of officers and Board members. There were no such payments in 2010 and 2009.

Other matters

The Company, during the ordinary course of its operations, has been involved in various lawsuits and claims, some of which are still pending. In addition, the Company must comply with Federal Energy Regulatory Commission-approved mandatory reliability standards, which if violated could result in penalties assessed to the Company. There are several matters currently pending related to alleged violations of these standards. Management and legal counsel are of the opinion that the outcome of these matters will not have a material adverse impact on the financial position or results of operations of the Company.
