Docket No. ER11-2256-000

**MOTION OF THE CALIFORNIA INDEPENDENT SYSTEM
OPERATOR CORPORATION FOR EXTENSION OF TIME TO
FILE POST-TECHNICAL CONFERENCE COMMENTS**

Pursuant to Rules 212 and 2008 of the Commission's Rules of Practice and Procedure,¹ the California Independent System Operator Corporation ("ISO") respectfully requests an additional extension of time until December 30, 2011 for filing initial post-technical conference comments and until January 15, 2012 for filing post-technical conference reply comments. In support of this motion, the ISO states as follows:

1. On April 28, 2011, the Commission held a technical conference to address, *inter alia*, issues designated by FERC staff related to the ISO's proposed Capacity Procurement Mechanism compensation methodology, Exceptional Dispatch mitigation provisions, and eligibility of demand response to participate in the Resource Adequacy program. By Notice issued May 3, 2011, the Commission established May 27, 2011 as the date for the parties to file initial post-technical conference comments and June 15, 2011 as the date for filing post-technical conference reply comments.

2. On May 20, 2011, the ISO filed a motion requesting a 30-day extension of the procedural schedule for the parties to file initial and reply comments on the technical

¹ 18 C.F.R. §§ 385.212 and 385.2008 (2010).

conference in order to allow time to conduct settlement discussions,. On May 23, 2011, the Commission issued a notice granting an extension of time to file post-technical conference initial comments until June 27, 2011 and reply comments until July 14, 2011.

3. On June 9, 2011, the ISO filed a motion requesting a second extension of time. The ISO stated that it had engaged in positive discussions with the parties, but that additional time was required to conduct the settlement discussions and attempt to reach a joint resolution of the outstanding issues. On June 14, 2011, the Commission issued a notice granting all parties an extension of time to file post-technical conference initial comments until July 27, 2011 and reply comments until August 15, 2011.

4. On July 21, 2011, the ISO filed a motion requesting a third extension of time to file post-technical comments because the parties reached a settlement in principle and needed time to draft settlement documents and engage in further discussions. On July 27, 2011, the Commission issued a notice that granted all parties an extension of time to file post-technical conference initial comments until August 29, 2011 and reply comments until September 15, 2011.

5. On August 25, 2011, the ISO filed a motion requesting a further extension of time for the parties to submit post-technical conference comments until October 28, 2011 for initial comments and until November 15, 2011 for reply comments. The ISO indicated that the parties were making progress, but had not yet completed, drafting the settlement documents. By order dated August 25, 2011, the Commission granted the requested extension.

6. The ISO reports that the parties are nearing completion of the settlement documents that will be submitted in this matter. The ISO believes that extending the

comment filing dates by approximately 60 days will afford sufficient time for the parties to complete the settlement documents and for the ISO to submit them to the Commission. Granting the extension will thereby benefit the parties to this proceeding, as well as the Commission, and may avoid further and protracted litigation of the issues.

7. In order to avoid preparation and submission of post-technical conference comments by the parties while the settlement documents are being finalized, the ISO requests that the Commission: (1) shorten the applicable period for responding to this motion and require that any responses or comments be submitted by October 28, 2011, and (2) expeditiously grant the instant motion no later than October 28, 2011.

CONCLUSION

For the reasons set forth above, the ISO respectfully requests that the Commission grant the requested extension of time for the filing of initial and reply comments on the technical conference in this proceeding.

Respectfully submitted,

By: /s/ Beth Ann Burns
