

**Additional Responses to Information Request on IBAA submitted by
Silicon Valley Power Regarding the Full Network Model
April 16, 2008**

1) SVP Question: Please provide the release date of, and make available the contents of (to parties - such as SVP - that have signed the FNM Non-Disclosure Agreement), the first version of the FNM that mapped transactions at Tracy to Captain Jack (for all COTP) and Western Hub (for Western deliveries). Based on a review of the CAISO Market Notices during the June through August of 2007 timeframe, it appears that the appropriate FNM might be Version DB18, released with a market notice on August 1, 2007.

CAISO Response:

The first version of the CRR FNM that mapped transactions at Tracy to Captain Jack (for all COTP) and Western Hub (for Western deliveries) was released to parties that had signed the applicable NDA on August 1, 2007. This version of the CRR FNM was not previously released to SVP because SVP had not at that time signed an NDA. Pursuant to this request, and having received an executed NDA by representatives of SVP, the CAISO will mail the requested versions to the representative(s) of SVP that have signed the NDA.

2) SVP Question: Please also provide the release date of, and make available the contents of (to parties - such as SVP - that have signed the FNM Non-Disclosure Agreement), the immediately preceding release of the FNM – i.e., the last version of the FNM in which transactions at Tracy were not mapped back to Captain Jack (for all COTP) or the Western Hub (for Western deliveries).

CAISO Response:

The only version of CRR FNM in which transactions at Tracy were not mapped back to Captain Jack (for all COTP) or Western Hub (for Western Delivers) that has been released is DB 14. Again, at the time of the release SVP had not executed the NDA. Pursuant to this request, and having received an executed NDA by representatives of SVP, the CAISO will mail the requested versions to the representative(s) of SVP that have signed the NDA.

3) SVP Question: Further, please make available to all CAISO Market Participants the APNode table associated with the two FNM versions for CAISO's responses to requests #1 and #2 above. These tables would be comparable to the one titled "Table 1: APNODE available for CRR Nomination and Auction" in the CAISO's February 5, 2008 responses to IBAA questions.

CAISO Response:

See response beneath #4.

4) Additionally, SVP suggests that the CAISO make available to all interested Market Participants the related "MPDATA_APNode_Mapping" table that is in the "Common" worksheet for each of the FNM versions for CAISO's responses to requests #1 and #2 above. Since this table is similar to, yet more workable in nature than, the "Table 1: APNODE" referenced in request #3 above, SVP requests that the CAISO treat this table as non-confidential and therefore release it to all interested Market Participants.

CAISO response to # 3 and # 4:

The mapping data is available at <http://www.caiso.com/1fa5/1fa5b4d44f750.xls> . The mapping tables as they exist in the current and prior CRR FNM versions released cannot be provided to parties that have not signed the applicable NDA. Market Participants that already signed the NDA have the CRR FNM mapping tables.
