Step 0	OTC - Assumed constant at 2012 level																																								
2012	Maximum Import Capability (constant historical net schedules)																																								
	Total ETC for outside the control area loads																																								
	Total Pre-RA Import Commitments & ETC (load within ISO)																																								
	Remaining Import Capability after Step 4																																								
2013	Maximum Import Capability (constant historical net schedules)																																								
	Total ETC for outside the control area loads																																								
	Total Pre-RA Import Commitments & ETC (load within ISO)																																								
	Remaining Import Capability after Step 4																																								
2014	Maximum Import Capability (constant historical net schedules)																																								
	Total ETC for outside the control area loads																																								
	Total Pre-RA Import Commitments & ETC (load within ISO)																																								
	Remaining Import Capability after Step 4																																								
2015	Maximum Import Capability (constant historical net schedules)																																								
	Total ETC for outside the control area loads																																								
	Total Pre-RA Import Commitments & ETC (load within ISO)																																								
	Remaining Import Capability after Step 4																																								
2016	Maximum Import Capability (constant historical net schedules)																																								
	Total ETC for outside the control area loads																																								
	Total Pre-RA Import Commitments & ETC (load within ISO)																																								
	Remaining Import Capability after Step 4																																								
2017	Maximum Import Capability (constant historical net schedules)																																								
	Total ETC for outside the control area loads																																								
	Total Pre-RA Import Commitments & ETC (load within ISO)																																								
	Remaining Import Capability after Step 4																																								
2018	Maximum Import Capability (constant historical net schedules)																																								
	Total ETC for outside the control area loads																																								
	Total Pre-RA Import Commitments & ETC (load within ISO)																																								
	Remaining Import Capability after Step 4																																								
2019	Maximum Import Capability (constant historical net schedules)																																								
	Total ETC for outside the control area loads																																								
	Total Pre-RA Import Commitments & ETC (load within ISO)																																								
	Remaining Import Capability after Step 4																																								
2020	Maximum Import Capability (constant historical net schedules)																																								
	Total ETC for outside the control area loads																																								
	Total Pre-RA Import Commitments & ETC (load within ISO)																																								
	Remaining Import Capability after Step 4																																								
2021	Maximum Import Capability (constant historical net schedules)																																								
	Total ETC for outside the control area loads																																								
	Total Pre-RA Import Commitments & ETC (load within ISO)																																								
	Remaining Import Capability after Step 4																																								

Note 1 : This table assumes that the historical net schedules are the same (constant), when in fact they vary for year to year. PLEASE USE CAUTION!

Note 2 : When ETC expire, the ISO has assumed that first "used ETC" expire and then "unused ETC" expire this way these results show the highest RIC available. PLEASE USE CAUTION!

Note 3 : ISO does not guaranty accuracy of data supplied by each LSE

Note 4 : ETC import capability for loads outside the CAISO Control Area are held by the following entities: LADWP, WASN (WAPA in SMUD control area), IID, Nevada Power, SRP, APS (outside CAISO Control Area), SMUD, Redding, TID, MID ADLANTOSP_MSL; ADLANTOVICTVL-SP_MSL; FCORNER5_MSL; MEADELDORD_BG; TRACYHRDLN_BG; VICTVL_BG; CFEROA_MSL; CFETIJ_MSL; FCORNER3_MSL; and SCISL_BG are either redundant entries or can not be scheduled upon
