

Regional Integration Update

November 1, 2016

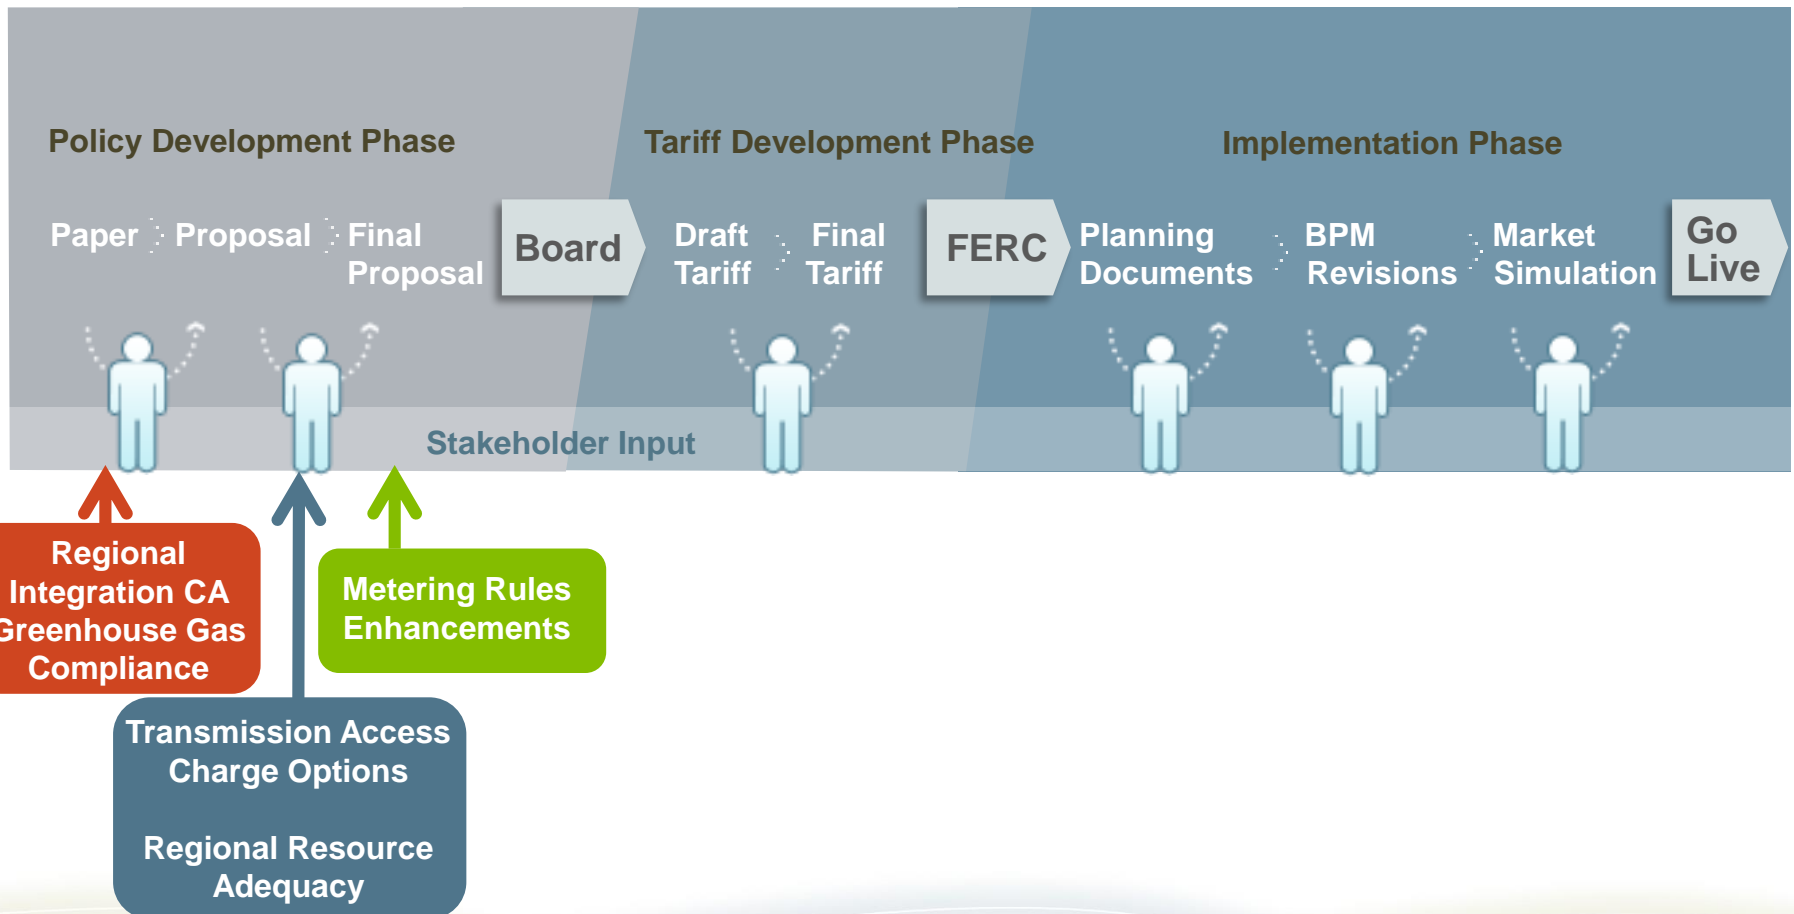

Agenda

Topics	Presenter
Stakeholder initiatives update	Virginia Thompson
SB350 update	Virginia Thompson
Online Resources	Kristina Osborne
Questions	

ISO Stakeholder Engagement Process

This diagram represents the typical process, often phases will run in parallel.

Current Stakeholder Initiatives - Regional

Transmission Access Charge Options

The current transmission access charge is a two-part rate for each megawatt hour of internal load and exports and is used to recover transmission revenue requirements. Revenue requirements for facilities rated 200 kV and above are recovered through a system-wide rate, while requirements for facilities rated below 200 kV are recovered via specific rates for each participating transmission owner. This initiative considers if the same structure would be appropriate should a transmission owner with a load service territory join the ISO as a participating transmission owner. This initiative began with an issue paper in late October 2015.

Upcoming activities:

- November 16 - ISO transmission planning workshop in Folsom, CA
 - Overview of Transmission Economic Assessment Methodology (TEAM)
 - Please note: this date has been updated since the ISO's presentation on Regional Stakeholder Initiatives at the CEC's Regional Grid Operator and Governance Workshop on October 17

- Early December - draft final proposal targeted

Audios of meetings and documents available at:

<http://www.caiso.com/informed/Pages/StakeholderProcesses/TransmissionAccessChargeOptions.aspx>

Note: These dates are tentative until confirmed by a market notice

Current Stakeholder Initiatives – Regional

Regional Resource Adequacy

This initiative evaluates whether the existing resource adequacy tariff provisions are appropriate for use in a regional ISO balancing authority area that encompasses multiple states. This initiative began with an issue paper in early December 2015.

Upcoming activities:

- Early December - draft final proposal targeted

Audios of meetings and documents available at:

<http://www.caiso.com/informed/Pages/StakeholderProcesses/RegionalResourceAdequacy.aspx>

Note: These dates are tentative until confirmed by a market notice

Current Stakeholder Initiatives – Regional

Greenhouse Gas Compliance

This initiative will determine how costs for generation to comply with California's greenhouse gas (GHG) regulations will be treated in the ISO's integrated forward market (IFM). The energy imbalance market currently has a methodology that enables generation resources to include GHG compliance costs in their offers to supply California load. Similar provisions must be developed for the IFM to address GHG compliance costs for new participating transmission owners outside of California. This initiative began in late August 2016.

Upcoming activities:

- November 17 – ISO will post a Straw Proposal
- December 1 – ISO will host a stakeholder meeting in Folsom, CA

Audios of meetings and documents available at:

<http://www.caiso.com/informed/Pages/StakeholderProcesses/RegionalIntegrationCaliforniaGreenhouseGasCompliance.aspx>

Note: These dates are tentative until confirmed by a market notice

Current Stakeholder Initiatives – Regional

Metering Rules Enhancements

This initiative will review existing metering requirements and propose possible revisions to accommodate the growth in renewables, energy storage and distributed energy resources; technology advancements, developer interest in new and complex metering configurations; expansion of regional markets through the energy imbalance market; and, the potential integration of other balancing authority areas into the ISO balancing authority area.

Upcoming activities:

- Nov 1 – ISO posted revised draft final proposal and attachments
- Nov 10 – ISO will host a web conference

<http://www.caiso.com/informed/Pages/StakeholderProcesses/MeteringRulesEnhancements.aspx>

Note: These dates are tentative until confirmed by a market notice

SB 350 update on upcoming activities

Study Work:

SB 350 study work is complete and was submitted to Governor Brown (CA) on September 15, 2016.

Data and information related to the Senate Bill 350 studies are available directly on the ISO's [Regional Energy Market](#) webpage.

See submitted comments on CEC website at:

<https://efiling.energy.ca.gov/Ecomment/Ecomment.aspx?docketnumber=16-RGO-01>

<http://www.caiso.com/Documents/SB350StudiesCompleted-Sent-Governor.html>

SB 350 governance modifications

Governance Work:

A 2nd Revised Proposal for Principles for Governance of a Regional ISO and a discussion paper on Potential Topics within the Primary Authority of the Western States Committee were presented on October 17 at a CEC workshop in Sacramento

Upcoming activities:

- November 11 – targeted date for ISO to publish a revised proposal on Potential Topics within the Primary Authority of the Western States Committee

For more information and audio recordings of past meetings, visit the CEC website at:
http://www.energy.ca.gov/sb350/regional_grid/documents/index.html
