

California ISO

# Release User Group Agenda

November 14, 2023

10:00 a.m.–11:00 a.m. (Pacific Time)

Web Conference Information	Conference Call Information
<p>Web Address: <a href="https://caiso.webex.com/caiso/j.php?MTID=m8f4dee2c7059898b3609c46be3cd2c20">https://caiso.webex.com/caiso/j.php?MTID=m8f4dee2c7059898b3609c46be3cd2c20</a></p> <p>Audio connection instructions will be available after connecting to the web conference. When prompted, select "Call me" and enter the phone number you will use during the call. You will be called by the conference shortly.</p>	<p><i>1-844-621-3956 United States Toll Free</i> <i>+1-650-479-3208 United States Toll</i> <i>Meeting number (access code): 2491 042 7352</i></p>
<p>Calls and webinars are recorded for stakeholder convenience, allowing those who are unable to attend to listen to the recordings after the meetings. The recordings will be publicly available on the ISO web page for a limited time following the meetings. The recordings, and any related transcriptions, should not be reprinted without the ISO's permission.</p>

# ISO Training Schedule

Training Course	Date and time
Transmission Registry Upgrade Training	November 15, 2023 9:00 am – 11:00 am

**New!** Use our Fall 2023 [Pre-Training Release Survey](#) to submit topics that you would like to see covered in the upcoming training.

Are you looking for more training?

The ISO Learning Center has computer based training available for lots of topics. Check out the Learning Center: <http://www.caiso.com/participate/Pages/LearningCenter/default.aspx>

# Release Plan Summary

## Release Communication

### Independent 2023 Releases

ADS Change to Partial Acceptance 11/15/23

E-Tag Auto Approval Change for E-Tags Submitted after T-20 11/15/23

URL & IP Changes (& AUP Changes) – Application Delivery Resiliency 11/15/23 & 01/09/24

Variable Operations & Maintenance Cost Review 12/1/23

Transmission Registry System Upgrade – Market Simulation 11/16/23; Production Dec 2023

### 2024 Releases

WEIM Resource Sufficiency Evaluation Enhancements Phase 2 Track 2 – Post HASP Curtailments: **Activation  
February 2024**

Transmission Service & Market Scheduling Priorities Phase 2

Transmission Exchange Agreement

WEIM Resource Sufficiency Evaluation Enhancements Phase 2 Track 3 – DR Inclusion

Hybrid Resources Phase 2C – RIMS

Congestion Revenue Rights System Upgrade

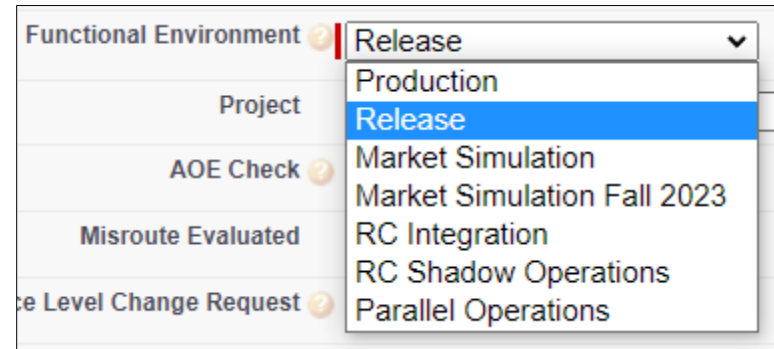

### Future Releases

Day-Ahead Market Enhancements

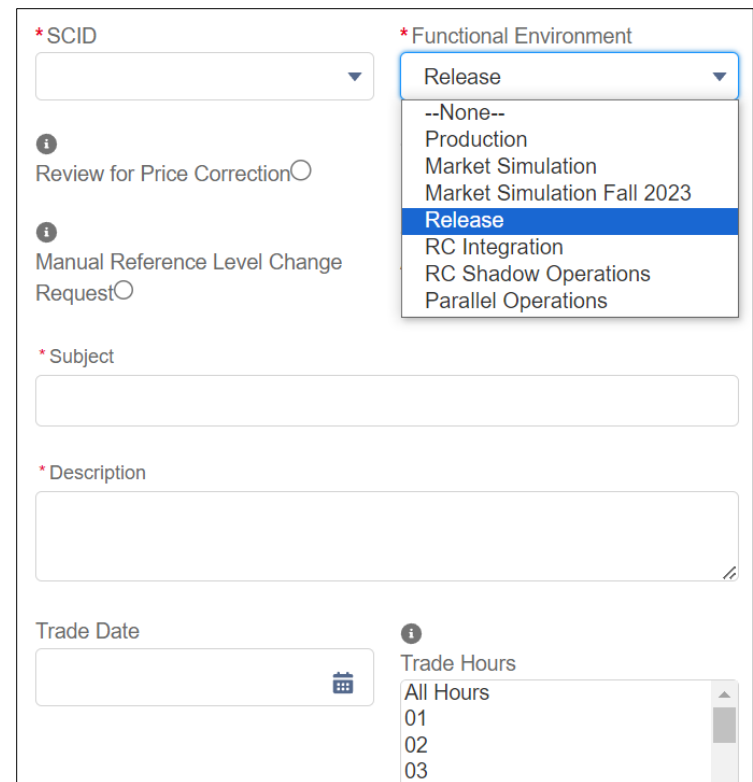

Extended Day-Ahead Market

# Release Communication

- CIDI cases
  - **No Environment – Release:** (New option)
    - Inquiries that are related to releases, that are not directly related to Market Simulation issues.
    - Includes business requirements specifications (BRS) comments, implementation questions and feedback, etc.
  - **Market Simulation:**
    - Inquires that are related to the MAP-Stage environments (non-production).
  - **Market Simulation Fall 2023:**
    - Now that Fall 2023 Release is in Production, only the option of 'Market Simulation' will remain as we are removing the seasonal options.
- Contact: [release@caiso.com](mailto:release@caiso.com)

A screenshot of a web application interface showing a dropdown menu for 'Functional Environment'. The menu is open, displaying several options: 'Release' (highlighted in blue), 'Production', 'Market Simulation', 'Market Simulation Fall 2023', 'RC Integration', 'RC Shadow Operations', and 'Parallel Operations'. The background shows a table with columns for 'Project', 'AOE Check', 'Misroute Evaluated', and 'Level Change Request'.

A screenshot of a form for creating a release. The form includes several fields and a dropdown menu for 'Functional Environment'. The dropdown menu is open, showing options: 'Release' (highlighted in blue), '--None--', 'Production', 'Market Simulation', 'Market Simulation Fall 2023', 'RC Integration', 'RC Shadow Operations', and 'Parallel Operations'. The form fields include: '\* SCID' (dropdown), '\* Functional Environment' (dropdown), 'Review for Price Correction' (radio button), 'Manual Reference Level Change Request' (radio button), '\* Subject' (text input), '\* Description' (text input), 'Trade Date' (calendar icon), and 'Trade Hours' (dropdown with options: 'All Hours', '01', '02', '03').

# Independent 2023 Releases

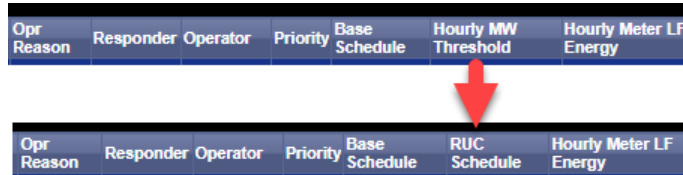

# ADS Change to Partial Acceptance Functionality

ADS Partial Acceptance Functionality allows users to partially accept the hourly pre-dispatch instructions for the specified MW amount. Both ADS UI and API interfaces allows this functionality during participant response window.

- ADS Partial Acceptance Change
  - Before the change - ADS is capping the partial acceptance MW value at Hourly MW threshold value/RUC schedule
  - After the change – ADS will cap the partial acceptance MW value at the Hourly DOT value.
- Both ADS UI and API interfaces will allow users to use partial MW value between 0 and Hourly DOT value.
- ADS UI user will receive a pop up display error message for the MW value outside the above acceptable range.
- There is no API interface change and current API method “partialAcceptInstruction” continue to work without any change from the users.
  - API users are requested to make sure that partialAcceptInstruction -> acceptDOT value is between 0 and Hourly DOT value.
  - For MW value outside the above acceptable range, API response will be RC\_INVALID\_RESPONSE. (Integer Value 1)

# ADS Partial Acceptance: UI Display Column Title Change

- The column display title for Hourly MW Threshold is renamed as RUC Schedule in both main display grids and ADS query tool display.

The diagram illustrates the change in column titles for a table. It shows two versions of a table header. The top version has columns: Opr Reason, Responder Operator, Priority, Base Schedule, Hourly MW Threshold, and Hourly Meter LF Energy. A red arrow points down from the 'Hourly MW Threshold' column to the 'RUC Schedule' column in the bottom version of the table header.

Opr Reason	Responder Operator	Priority	Base Schedule	Hourly MW Threshold	Hourly Meter LF Energy
------------	--------------------	----------	---------------	---------------------	------------------------

Opr Reason	Responder Operator	Priority	Base Schedule	RUC Schedule	Hourly Meter LF Energy
------------	--------------------	----------	---------------	--------------	------------------------

- There is no change in API service. The response element in the API service continue to refer hourlyMwThreshold.

# ADS Partial Acceptance: Technical Specification Documentation Update

- Published ADS Technical Specification Version **8.4.1** for Production Enhancement
  - PartialAcceptInstruction
    - Change to the Accept DOT value for Partial Accept functionality.
    - Restricting Partial Accept DOT value to be between 0 and Hourly DOT.
  - Change to ADS UI Interface
    - Change the column name “Hourly MW Threshold” to “RUC Schedule”
- Updated Technical Specification Version 8.4.1 can be found at:
  - Clean – [https://developer.caiso.com/Artifacts/ADS/TechSpecs/ADS\\_Interface\\_Specification\\_v8\\_4\\_1.pdf](https://developer.caiso.com/Artifacts/ADS/TechSpecs/ADS_Interface_Specification_v8_4_1.pdf)
  - Redline – [https://developer.caiso.com/Artifacts/ADS/TechSpecs/ADS\\_Interface\\_Specification\\_v8\\_4\\_1\\_REDLINE.pdf](https://developer.caiso.com/Artifacts/ADS/TechSpecs/ADS_Interface_Specification_v8_4_1_REDLINE.pdf)
- Schedule

Unstructured Market Sim to begin	10/31-11/9
<b>Production Deployment</b>	<b>Target 11/15</b>

# E-Tag Auto-Approval Change for E-Tags Submitted after T-20

The California ISO changes to E-Tag Auto-Approval for E-Tags submitted after the T-20 deadline is scheduled for implementation in Production on **Nov. 15, 2023**. After the implementation, the T-20 deadline is the latest time an E-Tag can be submitted before it is late.

Per NERC and NAESB standards, the T-20 deadline (less than 20 minutes before the start of the operating hour) is the latest time an E-Tag can be submitted before the time classification is Late.

Before the change, the California ISO auto approves any late tag submitted after T-20.

After the change, the California ISO will no longer auto approve E-Tags submitted after T-20 due to the reliability impact of late E-Tags. However, when applicable for reliability reasons, the ISO may manually approve any late E-tags on a case-by-case basis.

The associated Operating Procedures are [2510 NERC Tagging Requirements](#) and [5210A for Transmission Desk Logging](#).

# UI & API URL & IP Changes (Application Delivery Resiliency)

- Areas
  - Access Policy Manager - Application Authentication
  - Local Traffic Manager - Load Balancing
  - Application Security Manager - Web Application Firewall
- User Impacts & Actions
  - New IP ranges requiring firewall changes
    - Please open the entire 45.42.16.0/21 network on ports 80 & 443 for our new IP space
  - New URLs for UIs and APIs requiring cutover
  - No application functionality changes expected
  - No provisioning changes expected

# UI & API URL & IP Changes (Application Delivery Resiliency)

**Current API Notice:** The California ISO implementation of the first phase of the Production Application Programming Interface (API) Web Service (WS) Uniform Resource Locator (URL) cutovers is now scheduled for Nov. 15, 2023 and will make the new Production API WS URLs available. The next and final phase of the Production API WS URL cutovers is now scheduled for Jan. 9, 2024 and will move the existing Production API WS URLs to new infrastructure.

## Phase 1 – Nov. 15, 2023

- No changes to existing API WS URLs: <https://ws.caiso.com/sst/<SYSTEM>/<SERVICE>>
- New API WS URLs will be available: <https://ws.prod.caiso.com/sst/<SYSTEM>/<SERVICE>>
- Access to the new API WS URLs consist of the following that will require users to be configured per below:
  - **New IPs: Please open the entire 45.42.16.0/21 network on ports 80 & 443 for the new CAISO IP space**
  - **New Certificate Authority (was Verizon and is now Entrust): Please add the two Entrust certificates to your application trust stores on your servers**
  - **Global Rate Limit**
    - 30 per second across all the WS below combined per TCP source supported on the WS endpoint (1800 connections per minute); this includes submits and retrieves:
      - BAAOP/BSAP/CIRA/CMRI/DRRS/EIDE/ALFS (& FDR)/MF/PISOA/RCBSAP/RCSERVICES (RCEIDE)/SIBR/STLMT/OMS/ECIC
  - **Service-Level Acceptable Use Policy (AUP) for CMRI, DRRS, and MRI-S**
    - In addition to the Global Rate Limit above, these systems will have an additional layer of protection
  - CMRI
    - retrieves will leverage a 5-second period for enforcement
    - there are no CMRI submits
  - DRRS
    - Both submits and retrieves will leverage a 30-second period for enforcement
  - MRI-S (STLMT)
    - retrieves will leverage a 30-second period for enforcement
    - submits will not have any additional layer of protection other than the Global Rate Limit above

## Phase 2 – Jan. 9, 2024

- No additional changes to the new API WS URLs made available in Phase 1: <https://ws.prod.caiso.com/sst/<SYSTEM>/<SERVICE>>
- The existing API WS URLs: <https://ws.caiso.com/sst/<SYSTEM>/<SERVICE>> will be cutover to new underlying infrastructure
- Access to the existing API WS URLs will now also require users to be configured per below (same as above):
  - New IPs
  - New Certificate Authority (was Verizon and is now Entrust)
  - Global Rate Limit
  - Service-Level Acceptable Use Policy (AUP) for CMRI, DRRS, and MRI-S

Customers are encouraged to contact Trang Vo at [tvo@caiso.com](mailto:tvo@caiso.com) or release@caiso.com and/or submit a CIDI case for any questions.

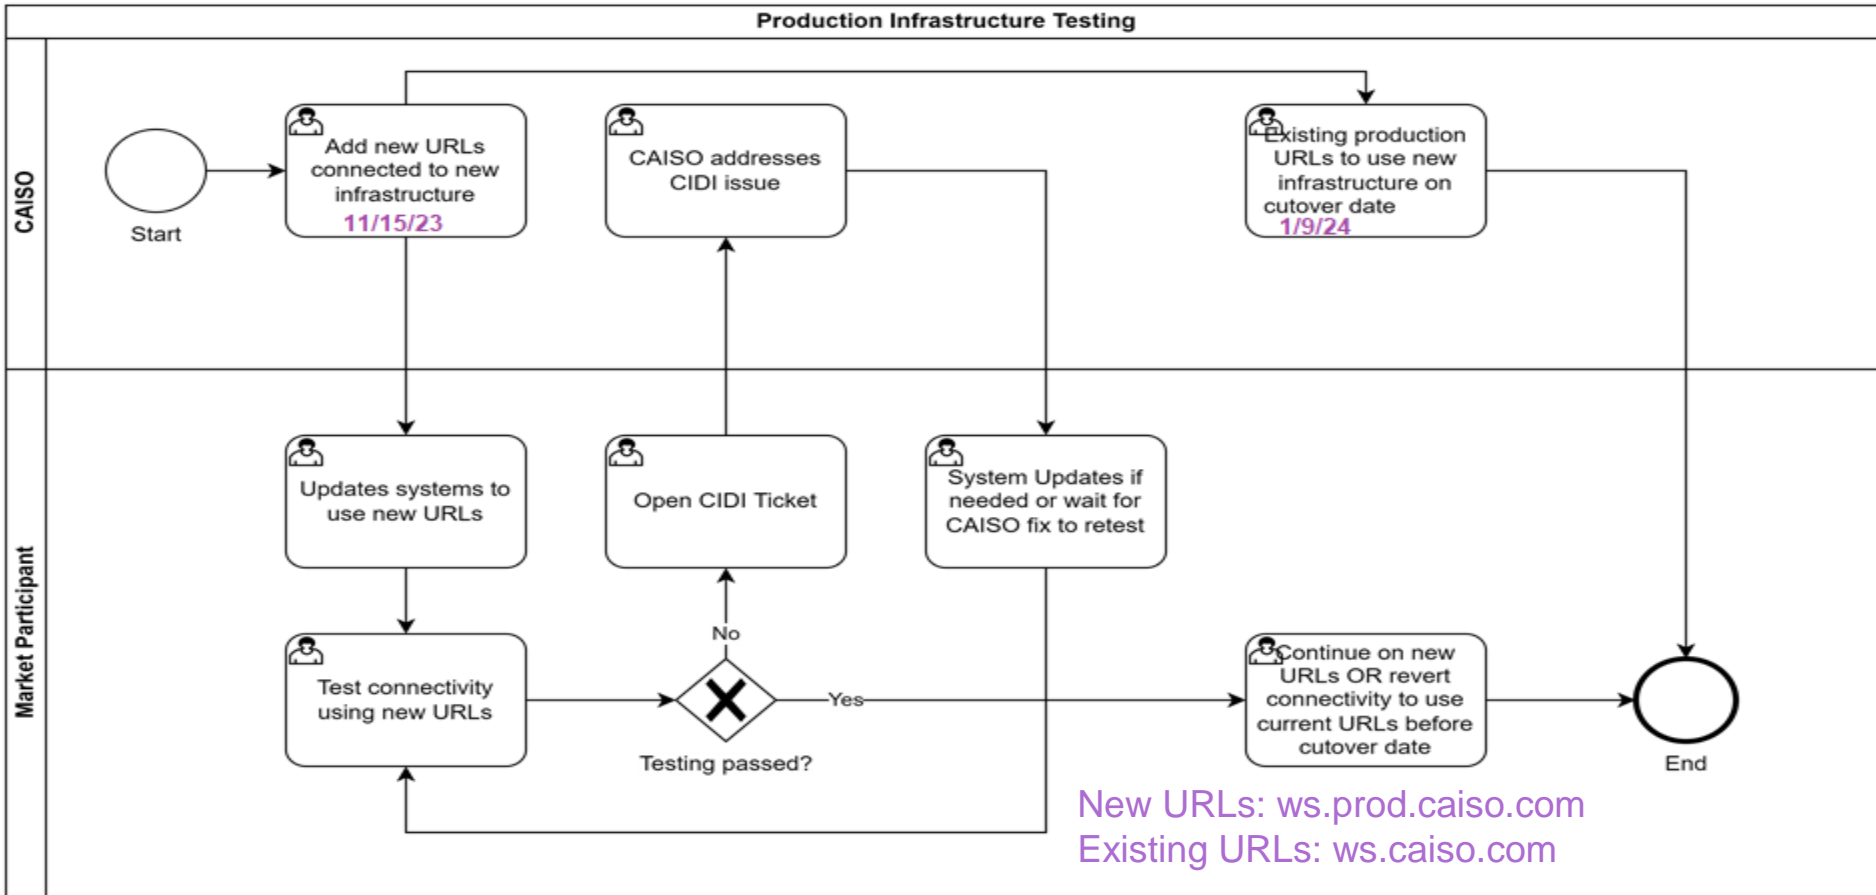

# UI & API URL & IP Changes (Application Delivery Resiliency)

## Production API Transition Plan – **Actions Necessary for API Users**

- **SOFT CUTOVER: Production new temporary/transition API URLs (ws.prod.caiso) to be available Nov 15, 2023 to transition**
- **HARD CUTOVER: Production current/existing (ws.caiso) API URLs cutover Jan 9, 2024**
  - **New infrastructure**
  - **New IPs**
  - **New Certificate Authority (Entrust)**
  - **Service-Level AUP for CMRI/DRRS/MRI-S**
- ~~Production new temporary/transition API URLs to be deprecated at a future date~~
- **Production new API URLs (ws.prod.caiso) will remain available indefinitely; users can continue using the new URLs or repoint to the original API URLs (ws.caiso)**
- Please open the entire 45.42.16.0/21 network on ports 80 & 443 for our new IP space to access new API URLs
- The Production transition and cut-over will be different than how MAP-STAGE occurred. The date for the new APIs to be available is target 11/15/23. There will be no changes to the Production existing API URLs until target 1/9/24.

# UI & API URL & IP Changes (Application Delivery Resiliency)

Customers can use the new URLs ([ws.prod.caiso.com](https://ws.prod.caiso.com) for the connectivity testing window (target 11/15/23-1/9/24). Then customers can either stay on the new URLs or revert back to the current URLs if desired any time during or after this period.

# UI & API URL & IP Changes (Application Delivery Resiliency)

1. 1) Here are the API URL formats for non-Production & Production; note what is available/permanent

	Old	New/Temporary for Transition	New
MAPSTAGE	<p>Deprecated &amp; no longer available as of 9/21/23</p> <ul style="list-style-type: none"> <li><a href="https://wsmap.caiso.com/sst/&lt;SYSTEM&gt;/&lt;SERVICE&gt;">https://wsmap.caiso.com/sst/&lt;SYSTEM&gt;/&lt;SERVICE&gt;</a></li> <li><a href="https://wsmap.caiso.com/sst/&lt;SYSTEM&gt;/&lt;SERVICE&gt;_DocAttach">https://wsmap.caiso.com/sst/&lt;SYSTEM&gt;/&lt;SERVICE&gt;_DocAttach</a></li> </ul>	NA	<p>Available permanently since 5/18/23</p> <ul style="list-style-type: none"> <li><a href="https://mapstage-ws.caiso.com/sst/&lt;SYSTEM&gt;/&lt;SERVICE&gt;">https://mapstage-ws.caiso.com/sst/&lt;SYSTEM&gt;/&lt;SERVICE&gt;</a></li> <li><a href="https://mapstage-ws.caiso.com/sst/&lt;SYSTEM&gt;/&lt;SERVICE&gt;_DocAttach">https://mapstage-ws.caiso.com/sst/&lt;SYSTEM&gt;/&lt;SERVICE&gt;_DocAttach</a></li> </ul>
PRODUCTION	<p>Available now on existing infrastructure</p> <ul style="list-style-type: none"> <li><a href="https://ws.caiso.com/sst/&lt;SYSTEM&gt;/&lt;SERVICE&gt;">https://ws.caiso.com/sst/&lt;SYSTEM&gt;/&lt;SERVICE&gt;</a></li> <li><a href="https://ws.caiso.com/sst/&lt;SYSTEM&gt;/&lt;SERVICE&gt;_DocAttach">https://ws.caiso.com/sst/&lt;SYSTEM&gt;/&lt;SERVICE&gt;_DocAttach</a></li> </ul>	<p>To be made available at a future date target 11/15/23 on new infrastructure to run in parallel with the left cell to support transition/testing, for a limited time</p> <ul style="list-style-type: none"> <li><a href="https://ws.prod.caiso.com/sst/&lt;SYSTEM&gt;/&lt;SERVICE&gt;">https://ws.prod.caiso.com/sst/&lt;SYSTEM&gt;/&lt;SERVICE&gt;</a></li> <li><a href="https://ws.prod.caiso.com/sst/&lt;SYSTEM&gt;/&lt;SERVICE&gt;_DocAttach">https://ws.prod.caiso.com/sst/&lt;SYSTEM&gt;/&lt;SERVICE&gt;_DocAttach</a></li> </ul>	<p>Original URLs to be cut-over to new infrastructure at a future date target 1/9/24</p> <ul style="list-style-type: none"> <li><a href="https://ws.caiso.com/sst/&lt;SYSTEM&gt;/&lt;SERVICE&gt;">https://ws.caiso.com/sst/&lt;SYSTEM&gt;/&lt;SERVICE&gt;</a></li> <li><a href="https://ws.caiso.com/sst/&lt;SYSTEM&gt;/&lt;SERVICE&gt;_DocAttach">https://ws.caiso.com/sst/&lt;SYSTEM&gt;/&lt;SERVICE&gt;_DocAttach</a></li> </ul>

2. As mentioned on the call and shown above, there are URL/IP changes in flight now for the APIs

1. Please open the entire 45.42.16.0/21 network on ports 80 & 443 for our new IP space
2. There is a new Certificate Authority for the new APIs (changed from Verizon to Entrust)
3. API Acceptable Use Policy: In addition the existing global rate limit of 30 per second across all the apps combined supported on the WS endpoint (1800 connections per minute), here are additional protections within these apps on the new URLs
  1. These will return a SOAP fault with AUP fails:
  2. <SOAP-ENV:Fault>
 

```
<faultcode>SOAP-ENV:Server</faultcode>
<faultstring xml:lang="en">429: CAISO Acceptable Use Policy Violation. Please retry your request after <n> seconds.</faultstring>
<detail>
```
  3. Apps
    1. CMRI
    2. DRRS
    3. STLMT

4. Impacted APIs on next slide

# UI & API URL & IP Changes (Application Delivery Resiliency)

	Old	New/Temporary for Transition	New
MAPSTAGE	<p>Deprecated &amp; no longer available as of 9/21/23</p> <ul style="list-style-type: none"> <li><a href="https://wsmap.caiso.com/sst/&lt;SYSTEM&gt;/&lt;SERVICE&gt;">https://wsmap.caiso.com/sst/&lt;SYSTEM&gt;/&lt;SERVICE&gt;</a></li> <li><a href="https://wsmap.caiso.com/sst/&lt;SYSTEM&gt;/&lt;SERVICE&gt;_DocAttach">https://wsmap.caiso.com/sst/&lt;SYSTEM&gt;/&lt;SERVICE&gt;_DocAttach</a></li> </ul>	NA	<p>Available permanently since 5/18/23</p> <ul style="list-style-type: none"> <li><a href="https://mapstage-ws.caiso.com/sst/&lt;SYSTEM&gt;/&lt;SERVICE&gt;">https://mapstage-ws.caiso.com/sst/&lt;SYSTEM&gt;/&lt;SERVICE&gt;</a></li> <li><a href="https://mapstage-ws.caiso.com/sst/&lt;SYSTEM&gt;/&lt;SERVICE&gt;_DocAttach">https://mapstage-ws.caiso.com/sst/&lt;SYSTEM&gt;/&lt;SERVICE&gt;_DocAttach</a></li> </ul>

## UI & API URL & IP Changes (Application Delivery Resiliency) – Certification Authority

- New Certificate Authority
  - There is a new certificate authority for the new API URL infrastructure: It was Verizon and is now Entrust
  - Please add the two certificates to your application trust stores on your servers to access the new API URL infrastructure
  - The new Production API URLs and existing Production API URLs after cutover have a different Root and Intermediate certificate:
    - Entrust Root Certification Authority – G2
    - Entrust Certification Authority – L1M

# UI & API URL & IP Changes (Application Delivery Resiliency) – Certification Authority

The screenshot shows a web browser window with the address bar displaying `ws.prod.caiso.com/sst/cmri/RetrieveMarketAwards_CMRIv4_AP`. The main content area displays an XML error message: "This XML file does not appear to have any style information associated with it". Below the message is the XML code:

```
<?xml version="1.0" encoding="UTF-8" ?>
<soap:Envelope xmlns:soap="http://schemas.xmlsoap.org/soap/envelope/">
  <soap:Header />
  <soap:Body>
    <soap:Fault>
      <faultcode>soap:Client</faultcode>
      <faultstring>SECU1080: The security contract requires the document to be signed by the client</faultstring>
    </soap:Fault>
  </soap:Body>
</soap:Envelope>
```

Overlaid on the browser is a "Certificate Viewer: ws.prod.caiso.com" window. The "Details" tab is active, showing the following information:

- Certificate Hierarchy:**
  - Entrust Root Certification Authority - G2
    - Entrust Certification Authority - L1M
      - ws.prod.caiso.com
- Certificate Fields:**
  - Authority Information Access
  - CRL Distribution Points
  - Certificate Subject Alternative Name
  - Certificate Key Usage
  - Extended Key Usage
  - Certificate Policies
  - Signed Certificate Timestamp List
  - Certificate Signature Algorithm
- Field Value:**
  - Not Critical
  - DNS Name: ws.prod.caiso.com

# UI & API URL & IP Changes (Application Delivery Resiliency) – Certification Authority Questions

What do API customers need to do to access new URLs and maintain access to existing URLs after the cutover?

- Add the two Entrust certificates to your application trust stores on your servers (see image on previous slide)

Will customers be able to access the current Production API URLs (pre-cutover) after adding the two Entrust certificates?

- Yes, this is an addition of the two Entrust certificates to your trust store, but the existing Verizon certificates will still be there and work for the current Production API URLs pre-cutover

When should customers add the two Entrust certificates to their Production server application trust stores?

- This can be done now without impacting Production API access (see above), and should be done prior to 11/9 to access the new Production API URLs (ws.prod.caiso, and should be done NLT 12/20 to avoid impacts to Production API access on the existing API URLs (ws.caiso)

How will user certificates be impacted?

- No changes needed to user certificates for the Production API URL cutover
- User certificates are also changing from Verizon to Entrust as they expire and are renewed, but do not need to be on Entrust prior to the Production API URL cutover
- For example, if a user has an existing Verizon user certificate that expires mid-2024, that Verizon user certificate will still be able to access the new Production API URL infrastructure (11/9/23 onwards for new URLs, and 12/21/23 onwards for existing URLs)

# UI & API URL & IP Changes

## Phase 1: Deployment for new API URLs

- CAISO previously sent communications on the soft cutover for the new API URLs in the MAP Stage environment. Market Participants are required to validate access and transition to the new API URLs before August 15, 2023. **The old API URLs in MAP Stage are no longer available as of September 1, 2023.** For Production, there are no changes to the current/existing API URLs; however, the IP addresses and infrastructure will be changed.

## Phase 2: Deployment for new UI URLs

- Starting on July, 27, 2023, some of the ISO applications will be available for testing starting in the MAP Stage environment and then Production. Application access is based on the user's provisioning. No application down time is expected. We will send additional communication for the remaining UI URLs once they are ready for validation.

## Action requested:

- Market Participants can begin accessing the new UI URLs in parallel with the current UI URLs for a window of time.
- The timeline to validate access and transition to the new UI URLs for each environment is shorter than the API timeline; therefore, action is needed sooner.
- Once the new UI URLs are deployed into Production, Market Participants have 30 business days to validate and transition to the new UI URLs.

# 2023 - Variable Operations and Maintenance Cost Review

Project Information	Details/Date
<b>High Level Project Scope</b>	<p>Through this triennially recurring stakeholder process, the ISO will review the default variable operations and maintenance (VOM) adders and, if necessary, update these default values.</p> <p>After reviewing the currently effective default VOM adders, the ISO is proposing to update the default values by applying a 18.73% inflation increase. For any resources currently using default values, the ISO will automatically update their VOM adder values in Master File. Any negotiated VOM adder values will not be affected by this initiative.</p>

# 2024 – Transmission Service & Market Scheduling Priorities Phase 2

Project Information	Details
<b>High Level Business Need</b>	Presents a long-term, durable framework to establish wheeling through scheduling priorities in the ISO markets that can further evolve with operational experience. It does not focus on, nor does it change, the processes for wheeling out or exporting from the ISO BAA.
<b>High Level Project Scope</b>	<p>The following are the key design elements of the proposed framework for establishing wheeling through scheduling priority across the ISO system:</p> <ul style="list-style-type: none"> <li>• Calculating Available Transfer Capability (ATC) in Monthly &amp; Daily Increments</li> <li>• Accessing and Reserving ATC</li> <li>• Transmission study and expansion process</li> <li>• Application of priorities in post-HASP process</li> <li>• Compensation framework for wheeling through scheduling priority</li> </ul>
<b>BPM Changes</b>	<ul style="list-style-type: none"> <li>• Market Instruments</li> <li>• Market Operations</li> <li>• Reliability Requirements</li> <li>• Settlements and Billing</li> <li>• Transmission Planning Process</li> <li>• Generator Interconnection and Deliverability Allocation Procedures</li> </ul>
<b>Tariff Changes</b>	<p>Sections:</p> <ul style="list-style-type: none"> <li>• §23.1, §23.2, §23.3, §23.4, §23.5, §23.6, §23.7</li> <li>• §26.1.4.5</li> <li>• §30.5.1</li> <li>• §34.12.3</li> <li>• §Appendix A</li> <li>• §Appendix L</li> </ul>
<b>Impacted Systems</b>	<ul style="list-style-type: none"> <li>• AIM</li> <li>• System for ATC calculation, access, and reservation</li> <li>• SIBR</li> <li>• RTM</li> <li>• Settlements</li> <li>• OASIS</li> <li>• ITS</li> </ul>

# 2024 – Transmission Exchange Agreement

Project Information	Details/Date
<b>High Level Business Problem or Need</b>	<p>The TEA is expiring in 2024 and absent WAPA’s ability to resell their capacity on the Pacific AC Intertie (“PACI”) #1 line which is owned and operated by WAPA-SNR and within the CAISO BAA they will move the line to the BANC BAA and the ISO will lose 1200 MW transfer capability at Malin.</p>
<b>High Level Project Scope</b>	<ul style="list-style-type: none"> <li>• WAPA needs functionality to sell their TOR (using ETC/TOR terminology instead of CRN) to other parties on their OASIS.</li> <li>• If the TOR rights are sold then WAPA will notify the CAISO to provide the purchaser the hedging and scheduling priority opportunity provided all ETCs/TORs.</li> <li>• The market and settlement systems need to be able to “move” the CRN from the WAPA CRN to the purchaser SCIDs so that the settlement to the purchaser SCID reverse the costs of transmission access charge and congestion (aka the perfect hedge) and the IFM and RTM provide a high scheduling priority.</li> <li>• WAPA will not take on the obligation to settle with their purchaser.</li> <li>• WAPA can sell any increments of MWs up to their 400 MW ownership rights. Therefore, the solution needs to be flexible enough to allow the “existing” TORs to vary the MWs capabilities. [Note: We can require restrictions, if required – e.g. no less than 5 MW increments]</li> <li>• WAPA’s functionality allows them to schedule between Malin and Round Mountain, and Malin and Tracy. This would be the source and sink that that functionality needs to provide.</li> <li>• If there are outages on the line, the curtailment should be consistent with current practice.</li> </ul>

# 2024 – Hybrid Resources 2C RIMS

Project Information	Details/Date
<p><b>High Level Business Problem or Need</b></p>	<p>The ISO launched this stakeholder initiative to identify new or enhanced market rules and business processes needed to accommodate hybrid resources, resources that consist of two sets of market rule changes that will facilitate mixed-fuel type (hybrid and co-located resources) project participation in the ISO markets.</p> <p>Prior to this initiative, Phase 1 identified a first set of modifications generally concerned with setting up and operating co-located resources.</p> <p>Building on phase 1, Phase 2 focuses on modifications that will explore how hybrid generation resources can be registered and configured to operate within the ISO market. The initiative will further develop solutions allowing developers to maximize the benefits of their resource’s configuration. Additionally, hybrid resource configurations also raise new operational and forecasting challenges that the ISO plans to address during this initiative.</p>
<p><b>High Level Project Scope</b></p>	<p>With this initiative, there’s an opportunity to increase storage and the number of hybrid resources that can connect to the ISO grid. Currently the interconnection queue includes more than 24,000 MW of mixed fuel projects and nearly 20,000 MW of storage which represents roughly half of all generation in the current interconnection queue.</p>

# 2024 - Congestion Revenue Rights (CRR) Upgrade

Project Information	Details/Date
<b>High Level Project Scope</b>	<p>The Congestion Revenue Rights (CRR) system was implemented by CAISO in 2008 as part of the Market Redesign and Technology Upgrade (MRTU) implementation. The current CRR system is at its end of life, does not have the flexibility to accommodate future policy changes and requires the ISO to calculate data and run processes manually outside the current system to produce a successful CRR Auction.</p> <p>The CAISO has decided on a significant upgrade of the existing CRR system and adopt the latest technology stack aligned with CAISO's technology standards, consolidate all CRR related functions, minimize human errors, reduce processing time, eliminate manual workarounds, and positions the system to accommodate policy changes down the road.</p> <p><b>Congestion Revenue Rights (CRR) system replacement project scope is the roll-out of a:</b></p> <ul style="list-style-type: none"> <li>• Brand new user-interface (UI) system with an updated new look-and-feel, to replace the existing legacy system implemented during the MRTU 2008 go-live and brought up to current ISO technology standards</li> <li>• Set of application-programming interfaces (APIs) to enable integration between ISO and market participant systems</li> </ul> <p><b>Overall, to support the following in one consolidated CRR external-facing system:</b></p> <ul style="list-style-type: none"> <li>• Annual/Monthly Auction and Allocation market participant bid submission and results retrieval</li> <li>• Load data submission by CRR LSEs, CEC</li> <li>• Load migration data submission by CRR UDCs</li> <li>• Secured "Congestion Revenue Rights Full Network Model" information access</li> <li>• Private and public access of CRR market input and output information</li> </ul>
<b>BPM Changes</b>	<p>Congestion Revenue Rights</p> <ul style="list-style-type: none"> <li>• Enhancements made to the new CRR product.</li> <li>• Automatic publishing of CRR market results.</li> <li>• Automatic CRR notification.</li> <li>• New CRR schedule calendar.</li> <li>• New CRR FNM access.</li> <li>• New CRR data submission and download interface UI/API.</li> <li>• New CRR market results interface.</li> <li>• Load Migration</li> </ul>
<b>Tariff Change</b>	<p>No</p>
<b>Impacted Systems</b>	<p>CRR, AIM, CMRI, OASIS, CTS, Market Clearing, EMMS, IFM/RTN, MQS, Master File, MPP, Settlements, WebOMS, ETCC.</p>

# 2024 - Congestion Revenue Rights (CRR) Upgrade

System	High Level Changes
<b>CRR</b>	<p>Significant system upgrade including:</p> <ul style="list-style-type: none"> <li>• Enhancements made to the new CRR application.</li> <li>• Automatic publishing of CRR market results.</li> <li>• Automatic CRR notification.</li> <li>• New CRR schedule calendar.</li> <li>• New CRR FNM access.</li> <li>• New CRR data submission and download interface UI/API.</li> <li>• Other TBDs identified through BRS development.</li> </ul>
<b>AIM</b>	<ul style="list-style-type: none"> <li>• New users and roles to support new CRR functionality</li> </ul>
<b>CMRI</b>	<ul style="list-style-type: none"> <li>• Full and incremental Payload publishing</li> <li>• Publish CRR Awards payload on event-driven, ad-hoc or scheduled basis</li> <li>• Publish CRR Awards payload on event-driven, ad-hoc or scheduled basis</li> </ul>
<b>OASIS</b>	<ul style="list-style-type: none"> <li>• Publish CRR Calendar, and all available CRR market names, and credit margin information, 3 year historical expected value..</li> <li>• Allow authorized users to publish CRR inventory payloads</li> <li>• Broadcast the following: set aside values, the results of all CRR markets, retired pnode/anode mapping, binding constraints, initial and updated CRR source and sink list for each CRR market,</li> </ul>
<b>CTS</b>	<ul style="list-style-type: none"> <li>• Broadcast</li> </ul>
<b>EMMS</b>	<ul style="list-style-type: none"> <li>• CRR will consume data from EMMS</li> </ul>
<b>IFM/RTN</b>	<ul style="list-style-type: none"> <li>• CRR will consume data from IFM/RTN</li> </ul>
<b>MQS</b>	<ul style="list-style-type: none"> <li>• MQS will consume and process SCID in a new format</li> <li>• MQS will consume ownership payload in bulk</li> </ul>
<b>Master File</b>	<ul style="list-style-type: none"> <li>• Master File will be modified as needed to support the new CRR functionality</li> </ul>
<b>MPP</b>	<ul style="list-style-type: none"> <li>• CRR will provide pre-configured external reports</li> </ul>
<b>Settlement</b>	<ul style="list-style-type: none"> <li>• Settlements will be modified as needed to support the new CRR functionality</li> </ul>
<b>WebOMS</b>	<ul style="list-style-type: none"> <li>• CRR will consume data from WebOMS</li> </ul>
<b>ETCC</b>	<ul style="list-style-type: none"> <li>• CRR will consume data from ETCC</li> </ul>

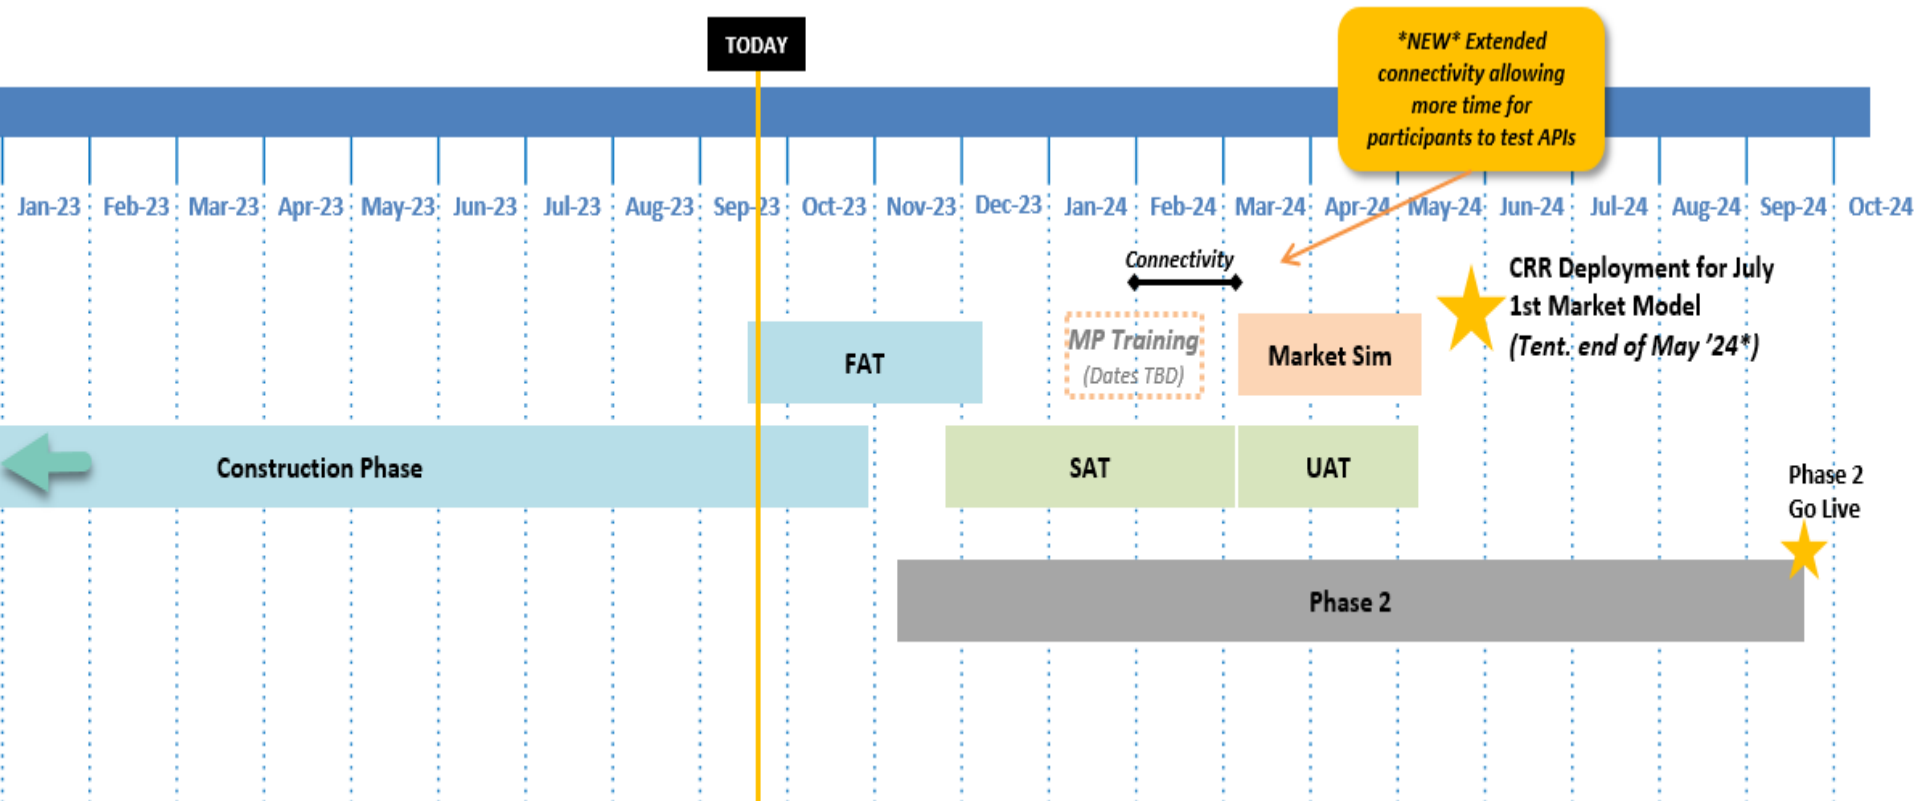

# 2024 - Congestion Revenue Rights (CRR) Upgrade

Updated September 2023

- Construction nearing end, but will continue through Factory Acceptance Testing (FAT)
- **Big Milestone!** Factory Acceptance Testing started week of 9/18, but delayed from target date
- Opportunities identified to compress functional testing timelines (SAT), so time savings anticipated
- **Impact on Go Live Date still TBD** – will know more as FAT progresses
- Connectivity – 3 weeks extend connectivity plus standard one week connectivity.

# 2024 - CRR System Upgrade – Get Connected

- CRR meetings:
  - **Bi-weekly Technical User Group (TUG)** Tue 10 AM, alternates with RUG.
    - Meetings available on the CAISO calendar on [www.caiso.com](http://www.caiso.com)
    - Meeting details and presentation materials are available on the CAISO Developer site at [www.developer.caiso.com](http://www.developer.caiso.com) , which requires an account to be setup for access
  - **CRR Customer Partnership Group**
    - **Next CPG meeting is Wed, 12/13 @ 10 AM**
    - Monthly
    - Meetings available on the CAISO calendar on [www.caiso.com](http://www.caiso.com)
    - Meeting details and presentation materials are available on [www.caiso.com](http://www.caiso.com) > Stay Informed > Meetings & Events > Customer Partnership Groups

# Day Ahead Market Enhancements

Project Information	Details/Date
<p><b>High Level Business Problem or Need</b></p>	<p>In recent years, Variable Energy Resource (VER) have gained significant traction in the energy grid, playing a crucial role in achieving renewable energy targets and reducing greenhouse gas emissions. However, their increasing presence has introduced a new challenge energy imbalances between the Day Ahead and Real Time markets.</p> <p>Another reason for the energy imbalance is the day-ahead market operates on hourly time increments, whereas real-time market schedules energy in 15 and 5-minute intervals. This discrepancy in granularity results imbalances since the rea-l-time market schedules fluctuate within the hour while day-ahead market schedules remain fixed for the entire hour.</p> <p>These imbalances necessitates out-of-market interventions by operators, such as forecast biasing and dispatches, to uphold grid reliability. However, this situation presents an opportunity to improve our market software, enabling us to achieve a more efficient and economical solution while addressing the variability and reliability concerns within the market.</p>
<p><b>High Level Project Scope</b></p>	<p>Enhance the California ISO's (CAISO's) day-ahead market by:</p> <ul style="list-style-type: none"> <li>• Introducing an imbalance reserve (IRU/IRD) product to provide flexible capacity to account for real-time ramping needs</li> <li>• Enhancing the residual unit commitment process to also ensure there is sufficient downward dispatch capability (RCU/RCD)</li> <li>• Enhancing the day-ahead market to maximize benefits of greater West-wide diversity in the day-ahead optimization for Western Energy Imbalance Market participants</li> </ul>
<p><b>BPM Changes</b></p>	<p>Settlements and Billing, Market Instruments &amp; Market Operations</p>

# Extended Day Ahead Market (EDAM) Implementation

Project Information	Details/Date
<b>High Level Business Problem or Need</b>	<p>The purpose of this initiative is to create a comprehensive extended day-ahead market that extends over multiple balancing authority areas (BAAs) participating in the WEIM. EDAM is a voluntary day-ahead electricity market with the potential to deliver significant economic, environmental, and reliability benefits for participants across the West. EDAM will more efficiently and effectively integrate renewable resources and address the significant operational challenges presented by a rapidly changing resource mix, emerging technologies, and the impacts of climate change. EDAM will enable procurement of robust supply and flexible capacity that will position EDAM participants to effectively address changes in conditions from day-ahead to real-time, improving their response to potential reliability challenges. EDAM builds upon the proven ability of the Western Energy Imbalance Market (WEIM) to increase regional coordination, support state policy goals, and cost effectively meet demand..</p>
<b>High Level Project Scope</b>	<p>The EDAM design leverages existing features of the ISO day-ahead market that are common in other day-ahead markets across the country. The design also considers enhancements proposed in contemporaneous stakeholder initiatives, that will harness flexibility across the larger footprint by incorporating an imbalance reserve product, and that will enhance price formation. EDAM introduce new products, imbalance reserve and reliability capacity, as well as new penalties, RSE surcharge.</p>
<b>BPM Changes</b>	<ul style="list-style-type: none"> <li>Definitions and Acronyms</li> <li>Energy Imbalance Market (EIM)</li> <li>Market Instruments</li> <li>Market Operations</li> <li>Settlements and Billing</li> <li>EDAM</li> </ul>
