NERC/WECC for AY 2023

- The California ISO has posted the North American Electric Reliability Corporation/Western Electricity Coordinating Council (NERC/WECC) information files to the Market Results Interface - Settlements (MRI-S) and the Secure File Transfer Protocol (SFTP) server on May 9, 2022. The files contain the 2021 NERC/WECC metered demand for assessment year 2023 for scheduling coordinator (SC) review, pursuant to ISO tariff section 11.20.4(a).

Item	Value	Unit
Total NERC/WECC Metered Demand for Calendar Year 2021	216,037,246.08	MWh
Estimated Preliminary NERC/WECC Charge Rate for Assessment Year 2023	0.048097904	\$/Mwh

- 2021 NERC/WECC metered demand is the summation of monthly NERC/WECC metered demand quantities published previously in the T+11M recalculation statements for January 2021 through April 2021, and T+70B recalculation statements for May 2021 through December 2021. Details regarding assessment of Charge Code 6490 NERC/WECC Charge are provided in the [Settlements and Billing Business Practice Manual](#) (BPM) configuration guide

Spring 2022 Settlement Release

- Release Scope:
 - Project: WEIM Resource Sufficiency Evaluation Enhancements Phase 1
 - Non-project: see scope details below
- 1st draft tech docs posted: **1/10**
- 1st draft config output file + release component summary posted: **1/25**, contains **all** scope elements for JOU Pilot April 2022 Release + Spring 2022 Settlements Release + Hybrid Resources P2B configuration changes
- 2nd draft config output file + updated release component summary posted: **4/5**
- Sample Statement window: calendar dates **4/4 – 5/20**
 - WEIM RSEE Phase 1 mkt sim start: **5/19**
 - Settlement code is calculating in mapstage as of TD 3/31 initial
- Pre-prod configuration output file + release artifacts target: **5/18**
- Anticipated prod deployment: **5/25**
- Next RUG = Tuesday, **5/17**

Late Spring May 2022 Settlements Release Component Summary	
ISSUE SUMMARY	IMPACTS
Settlement configuration changes to support EIM Resource Sufficiency Evaluation Phase 1	PRR 1431 BPM-CG CC 6046 Over and Under Scheduling EIM Allocation_5.4
Configuration adjustments to Shortfall and Default Loss allocation to ensure correct invoice content	PRR 1421 BPM - CG CC 5901 Shortfall Allocation Reversal_5.0a BPM - CG CC 5910 Shortfall Allocation_5.3a BPM - CC 5912 Default Loss Allocation_5.0a
Configuration changes to ensure IDS settlement in charge code 6456 aligns to tariff clarification filing	PRR 1419 BPM - CG CC 6456 Intertie Deviation Settlement_5.5
Configuration changes to ensure MSS deviation penalty calculation accurately accounts for Spin and Non-Spin dispatch energy.	PRR 1425 BPM - CG PC MSS Deviation Penalty Quantity_5.8
Retroactive configuration change to EIM Over and Under Scheduling (OUS) settlement to only include ELAP/CLAP meter values for Load Imbalance OUS Quantity	PRR 1422 BPM - CG CC 6045 Over and Under Scheduling EIM Settlement_5.3 BPM - CG CC 6046 Over and Under Scheduling EIM Allocation_5.1.1 BPM - CG CC 6046 Over and Under Scheduling EIM Allocation_5.3

Fall 2022 Settlement Release

- Release Scope:
 - Projects requiring settlement configuration changes: **Hybrid Resource P2B, FRP Deliverability, WEIM Enhancements Avangrid**
 - Projects with direct settlement impact: **Central Procurement Entity**
 - Non-project: scope to be communicated
- 1st draft tech docs targeting: **5/31**, Hybrid Resource P2B published already
- 1st draft config output file + release component summary targeting: **6/14**
- 2nd draft config output file + draft design docs + updated release component summary targeting: **6/29**
- 3rd draft config output file targeting: **7/25**
- Market Sim Window targeting: **7/25 – 9/2**
- Pre-prod configuration output file + release artifacts target: **9/21**
- Anticipated prod deployment: **9/28**
- Next RUG = Tuesday, **5/17**

Settlement Upgrade Project

Jeremy Malekos

jmalekos@caiso.com

Manager Market Settlement Production

Settlement Upgrade - Overview

The current settlement system, implemented in 2008 as part of the Market Redesign and Technology Upgrade (MRTU) implementation, is nearing its end of life. The CAISO is upgrading existing settlement applications to approved architectural and information security standards.

Benefits for our customers include:

- Improved business efficiency
- Better gathering and analysis for data and front-end improvements for customers interacting with CAISO Settlement Systems
- Increased transparency for some calculations
- Accommodating data processing increases resulting from new market products and an increase in market participants
- Ability to perform complex settlement calculations

Settlements Upgrade – Get Connected

- Vendors and Market Participants plan to attend:
 - **Settlement User Group (SUG)**
 - Schedule updates, request for enhancements, Configuration change details, examples, calendar format differences etc.
- Settlement technical users plan to attend:
 - **Bi-weekly Technical User Group (TUG)**
 - B2B Improvements and New API specifications will be presented and discussed in this meeting
 - meeting details and presentation materials are available on the CAISO Developer site at www.developer.caiso.com , requires an account setup for access

Note: Meetings are available on the CAISO calendar on www.caiso.com

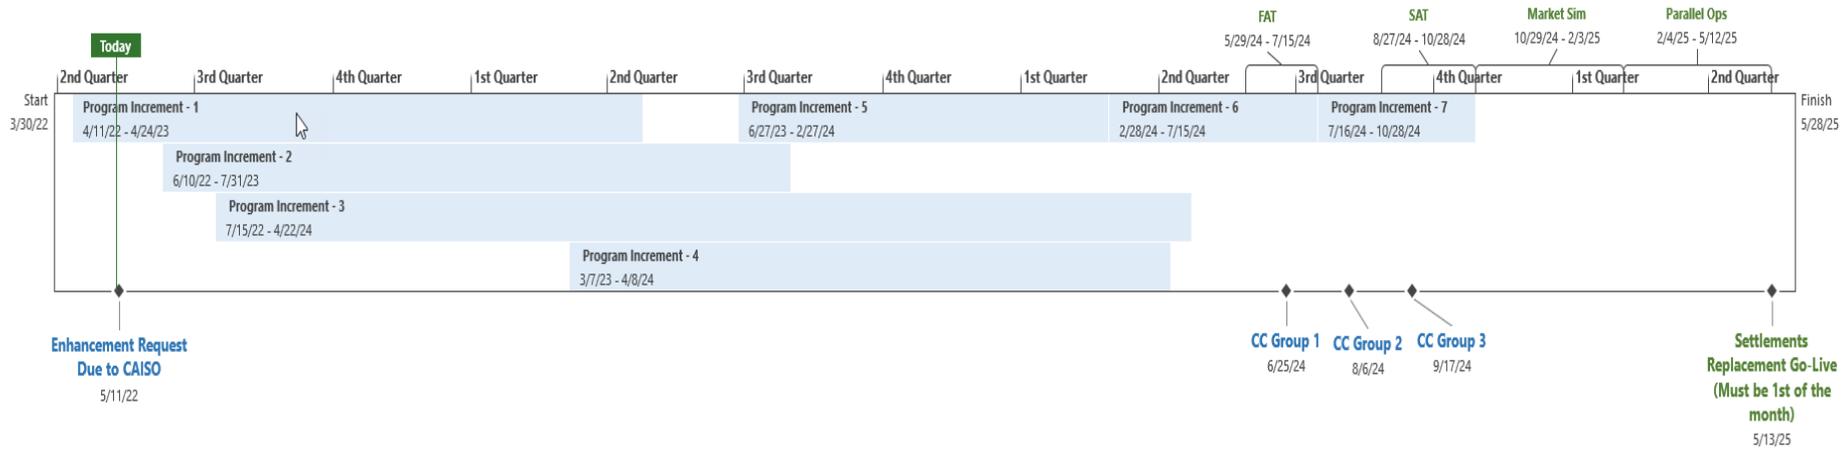

Settlements Upgrade – Targeted Goals

- The ISO will work closely with our market participants to ensure seamless transition from e-terra 2.5 to 3.0 configuration output file.
- The ISO will provide a forum for participants to ask more technical questions.
- The ISO will provide an environment with production-like data allowing customers to validate changes.
- The system will provide settlement outputs in various file formats, allowing all customers to access and use the data in day-to-day operations.
- The ISO will strive to make formulas and inputs transparent to enable market participants to monitor and/or validate settlement results.
- The ISO will provide market participants with an extended market simulation and timely support to the market participants and their vendors during the testing phase.

Settlements Upgrade – Targeted Goals Cont.

- From a vendor perspective:
 - ISO will provide third party vendors with support during the transition period.
 - ISO will provide an extended market simulation and/or parallel statements and invoices during the transition period so vendors can resolve defects on their systems.
 - ISO will provide open communications to resolve settlement differences through a customer forum.

Timeline

Settlements Upgrade – We would like to hear from you

- Decomposition of the settlement files
 - Migrating to OpenAPI specifications
 - Upgrading to a new output config file format
 - Any other enhancement requests?
-
- Next steps
 - Use the CIDI process to submit comments and enhancement requests. Your submittal will be reviewed and added to a master list that will be presented at the Settlement User Group (SUG)
 - The CIDI ticket will be closed once added to the SUG master list.
 - use CIDI title – “Settlement Upgrade Enhancement”

Settlement Upgrade – Enhancements list – due by 5/11

Submitted	Enhancement Request
4/1/2022	<p>There are some EIM CCs for which a final result is not available at a resource level, if possible please include the information for the following charge codes:</p> <ul style="list-style-type: none">o 4515 GMC Bid Transaction Feeo 4564 GMC-EIM Transaction Charge§ When EIM separation, min/max doesn't happeno 6046 Under Scheduling and Over Scheduling Allocationo 6478 Real Time Imbalance Energy Offset - Systemo 7076 Flexible Ramp Forecast Movement Allocationo 7077 Daily Flexible Ramp Up Uncertainty Award Allocationo 7078 Monthly Flexible Ramp Up Uncertainty Award Allocationo 7087 Daily Flexible Ramp Down Uncertainty Award Allocationo 7088 Monthly Flexible Ramp Down Uncertainty Award Allocationo 66200 Bid Cost Recovery EIM Settlement <p>Also, could CISO find a way to provide subEntity granularity under a single SC on statements & invoices. It would benefit many EIM BAs. Other markets have established a parent child relationship between entities called Market Participants (MPs) :: Asset Owners (AOs) where MPs are invoiced, but each AO can get a separate statement. Right now the only way to do that in CAISO / EIM is to create a separate SC and pay extra admin fees.</p>
5/9/2022	<p>An enhancement request for the new settlement system is to provide Electric Quarterly Report (EQR) data for market participants in a format adhering to the Transaction section of FERC's EQR Data Dictionary.</p>

Settlement Upgrade – Enhancements list – due by 5/11

Submitted Enhancement Request

- 5/3/2022
- 1.) CAISO can help EIM settlement users to perform validation more efficiently by posting the following key calculating dataset in CMRI:
 - Forecast and Actual “Loss Factors” for each BAA at each interval (currently, CASIO only posted the LOSS MW for each interval in OASIS)
 - o We believe the “Forecast vs. Actual” Loss Factors will be a much more meaningful & important settlement elements to disclose in CMRI.
 - RTCO CC67740: Suggest CMRI Report that displays “Shift Factors”
 - o “Shift Factors” that determine the Marginal Congestion Cost (MCC) breakdown price calculation for any affected BAA should be posted in CMRI for transparency of settlement
 - 2.) CAISO should provide a mapping report between “APNodes” and “Resource ID” for EIM CC67740 RTCO validation
 - Per CAISO, Congestion detail calculation has been performed based on “APNodes” in the Billing Determinant level, however, EIM settlement have been settled at the “Resource ID” level.
Settlement users are not able to trace and determine which Resource(s) has/have caused the Congestion.
 - 3.) Settlements Reporting Suite
 - a. Whether it be just a section out of CMRI or something entirely different. To have the ability to validate items from the vendor directly to CAISO without having to dive into XML data would be invaluable.
 - 4.) Charge Code Transparency – down to bill determinants and formulas
 - a. We need the ability to dive into what is being charged and where. Currently this is the main ask from every entity of the ISO and individual vendors. We lack the ability to view anything beyond top-level charge code detail. When all of the value necessary to be more optimal in the market is to dive into the details behind those charge codes and find the main drivers within certain settlement outcomes
 - b. Also thinking about the more complex charge codes like RTIEO, RTCO, RTMLO, BCR, Flex Ramp.
 - 5.) Market Transparency
 - a. The ability to view price and production detail at other positions across the footprint within the confines of market compliance.
 - i. If there is a congestion event, we would like the ability to find the responsible BA(s) for that event. As well as the location of that event. This has direct impact on the entity for validation purposes.
 - ii. If another entity is submitting an EIMBASE position with us, we should be able to view price and quantity details behind that transaction. This adds another challenge to validation to all transfers including load providing and wheeling.
 - iii. Transmission losses are incredibly difficult to investigate given the current system. With the latest UFE election process, this has become more necessary.

ISO Training Schedule

Training Course	Date and time
WEIM Resource Sufficiency Evaluation Enhancements Phase 1 (tentative)*	May 16, 2022 9:30am – 11am
Today's Outlook Webinar (tentative)	May 26, 2022 2pm – 3pm
Hybrid Resources Phase 2B Webinar (tentative)	July 18, 2022 10am – 11:30am
FRP Deliverability/BARR Replacement Webinar (tentative)	July 21, 2022 9am – 10:30am

* This training is specific to the WEIM audience. Check the WEIM portal for details.

Unscheduled Directed Recalculation Statements and Invoices

- On Dec. 9, 2021, the California ISO will publish unscheduled directed recalculation settlement statements reflecting the resolution of a dispute with a market participant. On the same day, the ISO will issue separate invoices for these amounts with a payment due date of December 15.
- A calendar reflecting the revised publication date, review period and invoicing is available on the ISO website at <http://www.caiso.com/market/Pages/Settlements/Default.aspx> under the *Retroactive settlements > Recalculation settlements > Unscheduled directed* subheading.
- The settlement files will be available under run type Daily Rerun Market trading dates Oct. 10, 2012, and Feb. 16, 2018. The details for October 10, 2012 will be in the comment field of the bill determinant file. Customer Service will provide the details for February 16, 2018, to affected market participants. Any disputes of charges appearing on the unscheduled directed recalculation settlement statements must be submitted by **Wednesday, January 12, 2022**.

NERC/WECC Invoice

- The ISO published preliminary NERC/WECC statements and invoices for 2022 NERC/WECC charges to the Market Results Interface-Settlements (MRI-S) and the Secure File Transfer Protocol (SFTP) server on August 20, 2021. The charges for assessment year 2022 appear on the NERC/WECC initial statement under charge code (CC) 6490, with January 1, 2020 as the trade date.
- The preliminary NERC/WECC charge rate for assessment year 2022 is provided below for scheduling coordinators' information pursuant to ISO Tariff section 11.20.4.

Item	Value	Unit
Total NERC/WECC Charge for Assessment Year 2022	10,170,748.45	\$
Total NERC/WECC Metered Demand for Calendar Year 2020	216,770,798.8	MWh
Preliminary NERC/WECC Charge Rate for Assessment Year 2022	0.046919366	\$/MWh

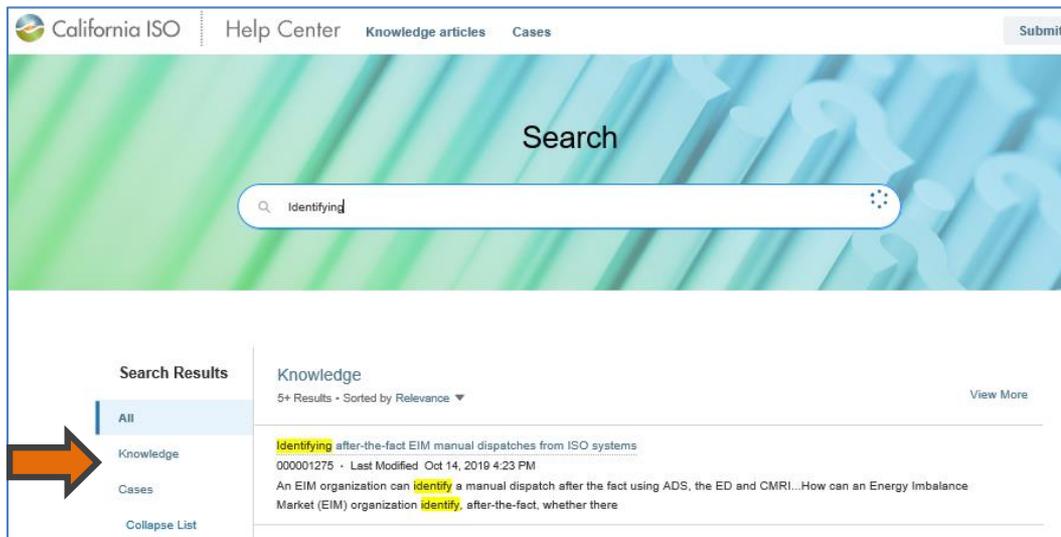

Knowledge Articles

CAISO has posted **Knowledge Articles** for FAQs in CIDI.

To access the articles in CIDI, you either:

Option 1: Type in the keyword “**Identify**” in the search field to pull up the article, or

Option 2: Click on the **Knowledge Articles** tab, and then click the **Settlements and Metering** category link to pull up a list of the Settlements related articles.
