OASIS Production Data Retrieval Issues

Functional variance for Group zip files were reported as market participants were unable to retrieve complete price information.

Issues encountered:

- RTM_LMP_GRP, RTD_SPTIE_LMP_GRP and RTPD_SPTIE_LMP_GRP - Missing intervals for HE24 for Multiple Trade Dates
- RTM_LMP_GRP, DAM_LMP_GRP and DAM_SPTIE_LMP_GRP - Combining all Price Types into one Response file

Resolution:

- Root cause was identified and we are working on a patch.
- As a part of this patch,
 - The “endtime” is ignored if the query is to pull “ALL” or “ALL_APNODES” nodes; ie query will return only 1 hours’ worth of data for all nodes at a time based on the “starttime” supplied
 - The “endtime” is referenced only when a node is supplied in the query
- We are testing the patch in Non-Production environments and *plan to apply the patch in Production next week.*

Reminders:

- If this message is returned: “<m:ERR_DESC> GroupZipDownload is in Processing, Please Submit request after Sometime</m:ERR_DESC>”, the API file generation process has initiated, and the users must retry the request to retrieve the completely generated file at a later time.
- CAISO requests to use the latest supported version as mentioned in the Tech Specs for application programming interfaces (API)
