Subject: [EXTERNAL] TPP Question

Hi,

I sent this through the chat but I'm also emailing.

I checked my phone and am not on mute. This isn't the first time this has happened.

Q1 - how was the DR amount determined? The CPUC unified assumptions has a table that shows 741 MW of DR that can count towards reconcile?

Q2 The combined larger region studied in previous years was LA Basin and San Diego subarea, but now it has shifted to the combined LA Valley area. Can you explain why the larger area shifted to LA Basin and San Diego/IV? What is the impact of the S-Line upgrade on the p

Thanks,

Lana
