

# Power Watch

## Powerful Habits

- Set thermostat at 78 degrees or higher
- Cool with fans
- Draw the drapes
- Turn off unnecessary lights and appliances
- Use big appliances in early morning or late at night

## CALIFORNIA ISO

### Stage One Emergency

Consumers are urged to reduce their use of electricity voluntarily to avoid severe conditions.

### Stage Two Emergency

Voluntary interruption of service to select customers is possible to avoid more severe conditions.

### Stage Three Emergency

Consumers are advised that involuntary interruptions of service have begun and will continue until the emergency has passed.

## California ISO Asks for Continued Conservation Efforts as the *Flex Your Power NOW! Power Watch* Remains in Effect Through Monday, July 25, 2005

High temperatures are forecast for the next few days. The California ISO is extending the *Flex Your Power NOW! Power Watch* through Monday, July 25th. Here are the forecast peak demand estimates:

- 43,600 megawatts (Saturday)
- 42,500 megawatts (Sunday)
- 44,402 megawatts (Monday)

Today's peak demand was 44,048 megawatts at 3:57 p.m. The Stage Two Electrical Emergency is expected to be terminated by 6:00.

The ISO does not anticipate any major issues in meeting the expected demand tomorrow, but the ISO system will be heavily loaded. Conservation—especially across the afternoon peak hours—helps reduce the demand and gives the ISO additional options should contingency actions be required. Visit [www.fypower.com](http://www.fypower.com) for conservation tips.

Stage One: Possible

Stage Two: Unlikely

Stage Three: Unlikely

This advisory is based on the best data available at the time of its release. Grid conditions can change rapidly. Information about the electricity supply within the California ISO's control area and the current demand on the system is available at [www.caiso.com](http://www.caiso.com).
