Powerful Habits

- Set thermostat at 78 degrees or higher
- Cool with fans
- Draw the drapes
- Turn off unnecessary lights and appliances
- Use big appliances in early morning or late at night

CALIFORNIA ISO

Stage One Emergency

Consumers are urged to reduce their use of electricity voluntarily to avoid severe conditions.

Stage Two Emergency

Voluntary interruption of service to select customers is possible to avoid more severe conditions.

Stage Three Emergency

Consumers are advised that involuntary interruptions of service have begun and will continue until the emergency has passed.

California ISO Urges Conservation in Southern California on Thursday, September 29th

California ISO is calling a *Flex Your Power NOW!* Day for Southern California only on Thursday, September 29th. Unseasonably hot weather in the southern region is driving the demand for energy. Temperatures today were 15-20 degrees hotter than yesterday in Southern California. Similar temperatures in the high nineties are forecast tomorrow.

In addition, fires burning in several locations pose a possible threat to transmission facilities in Southern California. As of Wednesday afternoon, the fires are not an imminent threat to transmission facilities but fire behavior can change quickly.

Conservation—especially across the afternoon peak hours—can help reduce the demand and give the ISO some additional options. Visit www.fypower.com for other information and conservation tips.
