In regards to the Interconnection Standards tariff language, LS Power has the following comment:

As per CAISO tariff, Appendix Y, Large Generator Interconnection Procedures, Section 11.1.1, CAISO is required to tender LGIA to Interconnection Customer within 30 calendar days of issuance of the Phase II study report. If an Interconnection Customer was issued Phase II study report for their project more than 30 days prior to June 10th (or the cut-off date CAISO chooses for exemption) but has still not been tendered LGIA, the project should be exempt from new interconnection requirements.

To this extent, LS Power proposes modification to the tariff language for first paragraph of Appendix H, which outlines the exemption criteria. The proposed modification is:

"Appendix H sets forth the requirements and provisions specific to all Asynchronous Generating Facilities that have not executed an LGIA or been tendered an LGIA by the CAISO as of June 10, 2010, or facilities that have received their Phase II study report thirty days or more prior to June 10, 2010."

If you have any questions about this comment, please feel free to give me a call at (925) 200 3492 to discuss.

Thanks,
