

Market Update Call Meeting Minutes

December 19, 2019¹

Agenda

- 1) Updates and Meeting Minutes Review – Rahul Kalaskar
- 2) Weekly Performance Report – Rahul Kalaskar
- 3) Price Correction Reports – Dov Quint
- 4) General Questions/ Comments– Rahul Kalaskar

Weekly Market Performance Report

Between November 27, 2019, through December 10, 2019 the day-ahead market observed more than \$100/MWh prices for SDGE DLAP on December 2, 2019 due to congestion on a transmission constraint. The real-time markets were generally quiet with very few price excursions. The root cause of price excursion in both the five and fifteen-minute market is shown on the first tab on of the report.

Review of the Price Correction Report

During the week of December 2-6, 2019, the ISO processed 85 intervals for price corrections due to software defect. During the week of December 09 - 13, 2019, the ISO processed 32 intervals due to data input error and software defect.

Questions on Price Correction Report

None

General Reminders

- **NOTE:** The current best practice, and preferred method, of asking questions is to route through the **Customer Inquiry, Dispute and Information system, “CIDI”**.
- Please submit your questions ahead of the call; there are occasions when we have to gather information: submission ahead of time allows us more preparation time to reply.
- To add general comments/questions/requests to the **action item list or meeting agenda**, market participants should also open corresponding CIDI tickets with both the Functional Environment as “Market Performance” and SCID as “XPUB” by close of business (COB) on Mondays.

¹ The California ISO (CAISO) hosts this bi-weekly market update conference call, generally at 10:15AM PST bi-monthly on Thursdays. This call is an opportunity for market participants to ask general questions regarding the market. Please send any questions to [CIDI system](#), which includes questions that have proprietary information and that might be commercially sensitive.
