## **II. BACKGROUND**

As described in the Notice of Filing, on February 26, 2002, the California Electricity Oversight Board ("Complainant") submitted for filing a complaint against specified sellers of long term power contracts to the California Department of Water Resources ("Respondents") alleging that the prices, terms, and conditions of such contracts are unjust and unreasonable and not in the public interest. Complainant alleges that Respondents obtained the prices, terms, and conditions in the contracts through the exercise of market power, in violation of the Federal Power Act, and that the prices, terms, and conditions are causing injury to the citizens and ratepayers of California and the State's economy.

### **III. BASIS FOR MOTION TO INTERVENE**

The ISO is a non-profit public benefit corporation organized under the laws of the State of California and responsible for the reliable operation of a grid comprising the transmission systems of Pacific Gas and Electric Company, San Diego Gas & Electric Company, Southern California Edison Company, and the City of Vernon, California, as well as for the coordination of the competitive electricity market in California. As the operator of the grid and coordinator of the competitive electricity market, the ISO believes that it has a unique interest in any Commission proceeding concerning the complaint described above. Accordingly, the ISO requests that it be permitted to intervene herein with full rights as a party.

#### **IV. CONCLUSION**

Wherefore, for the foregoing reasons, the ISO respectfully requests that the Commission permit it to intervene, and that it be accorded full party status in this proceeding.

Respectfully submitted,

---
