Phillip Muller philm@scdenergy.com 415-479-1710	<i>Ormat Technologies</i>	<i>8/5/11</i>

This template was created to help stakeholders structure their written comments on topics detailed in the *Generation Interconnection Procedures Potential Revision to Cluster 4 Study Methodology* paper located at <http://www.caiso.com/Documents/GenerationInterconnectionCluster4Phase1MethodologyDiscussionPaper.pdf>. We ask that you please submit your comments in MS Word to regionaltransmission@caiso.com no later than the close of business on **August 5, 2011**.

Your comments will be most useful if you provide the reasons and the business case for the issue(s).

Please respond to the question, “Do you generally support the proposal?”

Ormat agrees that something probably needs to be done to make the Cluster 4 Phase 1 process meaningful.

- 1. If yes, please provide comments on the details of the proposal.**

The proposal seems generally reasonable except for “orphan generation” – projects proposed for areas that are neither included in any CPUC portfolio area nor represented in Cluster 3. We need some clarification regarding how the ISO would proposed to deal with these Cluster 4 projects.

- 2. If no, why not?**

**Comments Template for July 29, 2011 Stakeholder Call
Generation Interconnection Cluster 4
Phase 1 Study Methodology**
