Powerful Habits

- **Set thermostat at 78 degrees or higher**
- **Cool with fans**
- **Draw the drapes**
- **Turn off unnecessary lights and appliances**
- **Use big appliances in early morning or late at night**

CALIFORNIA ISO

Stage One Emergency

Consumers are urged to reduce their use of electricity voluntarily to avoid severe conditions.

Stage Two Emergency

Voluntary interruption of service to select customers is possible to avoid more severe conditions.

Stage Three Emergency

Consumers are advised that involuntary interruptions of service have begun and will continue until the emergency has passed.

Monday, August 9, 2004 at 3:00 p.m.

This advisory is based on the best data available at the time of its release. Grid conditions can change rapidly. Information about the electricity supply within the California ISO's control area and the current demand on the system is available at www.caiso.com.

Conservation plays a key role in helping the California ISO balance the demand for energy with the available supply. During electrical emergencies conservation becomes a critical factor in avoiding or reducing the impact of rotating blackouts.

24-Hour Outlook for Tuesday, August 10th

California ISO Declares a

Flex Your Power Now Power Watch Day

A continuing triple-digit heat wave in the inland areas is expected to drive demand for power. Conservation will help us navigate through the daily afternoon peak. The California ISO requests the state's consumers watch their energy consumption, curtailing the use of electricity whenever possible, especially in the high demand afternoon hours between 4:00 and 6:00 p.m.

- Stage One: Unlikely Stage Two: Unlikely **Stage Three: Unlikely**
- Forecast peak demand: **45,649 megawatts** between 4:30-5:00 p.m.

48-Hour Outlook for Wednesday, August 11th

California ISO Declares a

Flex Your Power Now Power Watch Day

At or near triple-digit heat is forecast to continue in the inland valley areas through Thursday and conservation is appreciated. The California ISO requests the state's consumers watch their energy consumption, curtailing the use of electricity whenever possible, especially in the high demand afternoon hours between 4:00 and 6:00 p.m.

- Stage One: Unlikely Stage Two: Unlikely **Stage Three: Unlikely**
- Forecast peak demand: **45,853 megawatts** between 4:30-5:00 p.m.
