Board of Governors
California Independent System Operator
250 Outcropping Way
Folsom, CA 95630

Dear Board of Governors:

Iberdrola Renewables is writing in support of the EIM Governance Proposal and the Transitional Committee Charter being brought for approval by the CAISO Board of Governors on December 18th. Iberdrola Renewables believes a fully independent board is critical for the ultimate expansion of the EIM footprint across the West and commends the CAISO staff for their diligent efforts to design a process to facilitate this desired end state.

As drafted, the EIM Governance Proposal provides a robust two-step process for development of an EIM governance structure leveraging expertise and input from industry leaders across a full range of energy sectors. We support this approach and believe it will result in an optimal structure with maximum buy-in from key stakeholders.

As we have previously expressed, Iberdrola believes an EIM is an important first step toward increased regional coordination that will enable more efficient and economic dispatch of resources. Iberdrola Renewables thanks the combined CAISO and PacifiCorp teams for their willingness to step out and push this new concept forward for the benefit of the Western region.

Sincerely,

Kevin A. Lynch

Vice President, External Affairs
