Option 1: Sequential IFM-RDA

Please provide comments to explain your position on Option 1:

SDG&E opposes Option 1 because the main change is only replacing RUC with a new Reliability and Deliverability Assessment (RDA), so no major improvement is expected.

Option 2: Integrated IFM-RUC

Please provide comments to explain your position on Option 1:

SDG&E supports Option 2 because it has the potential for significant improvement over Option 1 by having less out-of-market intervention, reducing the impact of virtuals and placing more of the cost of reliability in the market solution with added transparency.

2. Please identify any specific data analysis that your organization recommends. Indicate the data request(s), the purpose of the request(s), and how the request(s) will advise the determination of the day-ahead market formulation, or will assist with determining the procurement target for the new day-ahead product.
