Workshops overall rating = Very Positive!

Testimonials- the best part of the Workshops:

- *Hands On Approach– Interaction with everyone at the table – SDGE*
- *Fast paced – good materials – good instructors - LADWP*
- *Liked the requirement that everyone in each group participate – SCE*
- *I appreciated the interaction with the personnel from the other utilities - SMUD*
- *Being in the company of highly skilled operators – TID*

Workshops overall rating = Very Positive!

More Testimonials- the best part of the Workshops:

- *To see what the other utilities have to deal with on a day-to-day basis; and what ISO does about it - **CDWR***
- *This program is something you should be proud of - **BPA***
- *I have received rave reviews from the CETAC training that our folks attended this year. The consensus is that our entire shop should attend next year, so we will work to that end. Thanks for having us, and thanks for the hard work and quality training. See you next year. - **Steve Johnson/RDRC Lead Reliability Coordinator***
