

Decision on Policy to Implement Resource-Specific System Resources

Daune Kirrene, Sr. Contracts Negotiator

California ISO
Your Link to Power

ISO Board of Governors
General Session
July 9, 2008

Import resources that identify the energy source get bid cost recovery according to MRTU Tariff.

- 🌐 Market participants requested service
- 🌐 FERC filing required
 - Pro forma agreement
 - Additional tariff language

The pro forma agreement and tariff language will clarify rights and obligations.

- 🌐 **Pro forma agreement establishes** relationship between the resource owner and the CAISO.
- 🌐 **Tariff sections describe:**
 - What agreement to execute
 - What resource information to provide
 - What telemetry data is required

Stakeholders support this proposed treatment of RSSRs under MRTU.

	Support Agreement?	Adopted Suggestions
Calpine Corporation	Yes	Generator may offer full or partial output.
Pacific Gas and Electric Company	NA	Subject to Uninstructed Deviation Penalties Subject to verification, inspection and testing of resource characteristics
Southern California Edison Company	Yes	Subject to tariff requirements Physical operating constraints must match description
Reliant	Yes
