CALIFORNIA ISO SUMMARY, DISCUSSION AND COMMENTARY

For the six-months ended June 30, 2009

OPERATIONS: (pages 1, 5, 6, and 7)

- ♦ Operating Revenues for June were \$17.2M, \$0.2M higher than budget.
 - The variance was primarily due to a higher estimated Grid Management Charge (GMC), partially offset by lower other revenues during the month.
- ♦ Operating Revenues for the year to date were \$95.9M, \$1.6M higher than budget.
 - The variance is primarily due to higher GMC revenues during the second quarter of the year as a result of higher market usage forward energy volumes due to higher participation in the day ahead market. Effective April 2009, the GMC is calculated under the new California ISO (ISO) Market tariff.
- ♦ Operation and maintenance (O&M) expenses for June were \$12.9M, \$0.6M higher than budget.
 - The variance was primarily due to timing of payments during the month and to the severance cost of organizational realignment that occurred during the month.
- ♦ O&M expenses for the year to date were \$78.3M, \$0.3M higher than budget.
 - The variance was primarily due to higher expenses as a result of higher overtime expenses and to the severance cost of organizational realignment that occurred in June 2009. The Company is actively monitoring the impact of these costs on the budget for the remainder of the year.
- ♦ There were 572 full-time employees compared to the 575 full-time employees budgeted (excluding the vacancy factor of 4%).

INTEREST COSTS and INTEREST INCOME: (page 1)

- ♦ Bond and other interest expenses, as compared to budget, were much lower due to the recognition of interest expense on certain amounts due from market participants as a result of a Federal Energy Regulatory Commission (FERC) ruling that was issued in May 2009. The Company recognized \$12.7 million as a reduction of interest expense with a corresponding adjustment to the estimated generator noncompliance fines refund liability.
- ♦ Interest income for the year to date is \$2.1M, \$0.7M higher than budget. Interest income includes earnings on restricted funds not included in the budget. The excluded funds are capital project and debt service funds and generator fines due to be refunded for which the interest approximated \$1.0M.
- ♦ Gains on investments increased during the period as a result of the recovery of bond prices in the financial sector. The Company typically holds investments to maturity and reflects realized gains and losses for GMC rate purposes.

BALANCE SHEET: (page 2)

- ♦ The changes in the accounts are mainly due to normal business activity during the month, except to changes in the generator noncompliance fines, as explained above.

CAPITAL PROJECTS: (pages 3 and 7)

- ♦ 2009 capital projects were budgeted for the year at \$38.5M and include \$9.4M for enhancements to the new ISO Market system. 2009 capital projects approved through June totaled \$13.5M.
- ♦ Actual expenditures to date for 2009-approved capital projects totaled \$9.6M. Expenditures for 2008-approved capital projects totaled \$16.8M.

**CALIFORNIA ISO
SUMMARY, DISCUSSION AND COMMENTARY**

For the six-months ended June 30, 2009

The ISO Markets

MARKET CHARGES: (page 8 and 9)

- ◆ The total costs managed by the ISO include GMC, Reliability Must Run charges, Ancillary Services Capacity, Real Time Energy and Transmission.

OBLIGATIONS OF MARKET PARTICIPANTS: (pages 10 and 11)

- ◆ Outstanding obligations of market participants decreased during the winter months, reflecting the seasonal low energy usage during the period. While credit monitoring required increased vigilance for the past several months as a consequence of the ongoing financial crisis, no market losses are anticipated related to such periods.
- ◆ The increase in market obligations during the second quarter reflects the addition of the forward markets under the new ISO Market.

CALIFORNIA ISO
