Re: Potrero Power Plant

Dear Mr. Mansour:

I cannot be there with you today, but I wish for you to receive my letter about the Potrero Power Plant. Our communities in Southeast San Francisco have suffered for far too long from this power plant and now is the time for us all to agree that we do not need this power plant.

For the children, suffering from the hazards of particulates, for the people, suffering from the pollution, for the environment suffering from the effects of the greenhouse gases, the Potrero Power Plant must shut down.

You must act with compassion today because we are watching you and listening to make sure you shut down this power plant next year. That means all of the power plant.

Sincerely,

A handwritten signature in cursive script that reads "Espanola Jackson". The signature is written in black ink and is positioned above the typed name.
