 California ISO	Operating Procedure	Procedure No.	2510A
		Version No.	12.7
		Effective Date	1/29/26
POR/POD-Scheduling Path Cross-Reference		Distribution Restriction: None	

1. Procedure Detail

1.1. Purpose

The California ISO (CAISO) market Scheduling paths are associated with the market Scheduling and tie points. In most cases, the name registered in the NAESB Electric Industry Registry (EIR) provided by the OATI webRegistry system is the same as the Tie Point. WECC tagging specifications require a single point to be designated as Point of Receipt/Point of Delivery (POR/POD) on NERC tags. The following table provides a cross-reference to match the NERC POR/POD with the CAISO market Scheduling path. This information regarding registered POR/POD's can also be found in the OATI Web Registry at <https://www.naesbwry.oati.com/cgi-bin/webplus.dll?script=/NAESBWRY/sys-main.wml>, but it requires a security certificate.

1.2. POR/POD-Scheduling Path Cross-Reference

ADJ BA	Scheduling Point Name	Physical Tie Name	EIR (webRegistry) (POR/POD dropdown)	CAISO "Market" TIE POINT	Intertie Constraint	Table Note
AZPS	DLN_5_GNODEM1	Delaney 500 intertie with AZPS	DELANEY500	DELANEY500	DELANEY500_ISL

 California ISO	Operating Procedure	Procedure No.	2510A
		Version No.	12.7
		Effective Date	1/29/26
POR/POD-Scheduling Path Cross-Reference		Distribution Restriction: None	

Note 6:	<i>TRCYCOTP (1567 MW), TRCYPGAE and TRCYCOTPISO (33 MW of CAISO rights) are all “Market” Tie Points that are aggregated at TRY500 for check-out with BANC.</i>
Note 7	<i>Per CAISO Tariff Appendix C, The SMUD/TID IBAA Import LMP will be calculated based on modeling of supply resources that assumes all supply is from the Captain Jack substation as defined by WECC. The SMUD/TID IBAA Export LMP will be calculated based on the Sacramento Municipal Utility District hub that reflects Intertie distribution factors developed from a seasonal power flow base case study of the WECC region using an equivalence technique that requires the Sacramento Municipal Utility District hub to be equivalence to only the buses that comprise the aggregated set of load resources in the IBAA, with all generation also being retained at its buses within the IBAA.</i>
Note 8	<i>Only resources registered through the Master File can schedule on PINALCENT500 intertie.</i>

 California ISO	Operating Procedure	Procedure No.	2510A
		Version No.	12.7
		Effective Date	1/29/26
POR/POD-Scheduling Path Cross-Reference		Distribution Restriction: None	

The following additional terms are capitalized in this Operating Procedure when used as defined below:

None

Version History

Version	Change	Date
12.0	Periodic Review: Minor edit in Purpose Section, spelling out POR/POD acronyms.	12/01/020
12.1	Periodic Review: Added Note 9 to clarify PNodes mapping for SMUD/TID. Updated from ISO to CAISO in most instances, minor format and grammar edits, and removed history prior to five years.	12/13/22
12.2	Added MEADN_2_N101 to MEAD230_ITC to accommodate LDWP ETSRs on MEAD230. Removed PACE from MONA_3_N501 row to resolve CIDI case 263548.	7/13/23
12.3	Added DELANEY500 tie point and removed history prior to five years.	6/12/24
12.4	Updated Westley-Quinto information with Westley-Fink.	7/01/24
12.5	Updated to include RDMTEA aggregated scheduling point and addition of RDM230 as a valid point for TRCYTEA. Renumbered Notes within Cross-Reference table and below. Added NERC Standard INT-006 under References. Minor punctuation edits for instances of cross-reference, including title.	5/14/25
12.6	Updated to include PINALCENTRAL intertie with SRP. Minor formatting and grammar edits and removed history prior to five years.	10/01/25
12.7	Periodic Review: No content changes only removed history prior to five years.	1/29/26
