Meeting Number:	8665282256	International Call In:	(216) 706-7052
Access Code:	6085978	Pass Code:	6085978
Time	Topic	Facilitator	
10:00 – 10:05	Agenda & ISO Roll call	Sean Crimmins	
10:05 – 10:15	Disabling TLS 1.0 and 1.1 Market Notice	Sean Crimmins	
10:15 – 10:30	WSDL Re-design project	Sean Crimmins	
10:30 – 10:35	Adjourn	Sean Crimmins	

Deactivation of Transport Layer Security (TLS) 1.0 & 1.1

SUMMARY

The California ISO will be deactivating Transport Layer Security (TLS) 1.0 and 1.1 in the market and performance (MAP) stage environment on September 6, 2017, and in the production environment on October 16, 2017. Deactivating these older TLS protocol versions aligns with industry best practices for security and data integrity. It is necessary for market participants to enable TLS 1.2 as soon as possible in browsers and APIs.

The full notice is available here:

<https://www.caiso.com/Documents/Deactivation-TransportLayerSecurityTLS10and11.html>

WSDL Re-design

- The ISO has begun gathering security requirements internally
- The ISO seeks input to see if participants require
 - Non-repudiation of transactions
 - Other security or audit requirements typically implemented at the message level
- Our objective is to right-size the security while also providing a more straight forward implementation and still meet execution speeds

Wrap-up

Please send agenda items to scrimmins@caiso.com
