5. Questions

Reliability Services Initiative Phase 1A implementation stabilization

RSI-1A known issues and workarounds

- FERC has approved the requested extension of the RAIM advisory period to April 1 2017.

Replacement Requirement Fluctuations

- 1) Mid-month resource to SC association changed causing increase in Replacement Requirement.
- 2) Scheduling Coordinator for the resource increased the outage duration or increased the curtailment amount which changed the priority date of the outage. Due to change in priority the outage moved up in the stack causing an increase in the Replacement Requirement
 - a) Can SCs hold off changing outages till T-12?

Reliability Services Initiative Phase 1B

- Questions regarding RSI-1B external BRS?
