

Ashley Kelly

Ashley Kelly joined APS in May of 2012 and is the Director of Transmission Operations and Maintenance, a position she has held since April 2024. Her team is responsible for reliably operating and maintaining APS's Bulk Electric System which includes APS's 6,000 miles of transmission lines and over 550 substations. Ashley joined APS as a rotational engineer in T&D after completing her electrical engineering degree from Gonzaga University. She also holds a master's in business administration from Arizona State University. Ashley has held various leadership positions in T&D including Balancing Authority operations and distribution construction roles and played a key role in APS's entrance into the Western Energy Imbalance Market. Prior to her current position, Ashley spent two years in APS's state regulatory department leading APS's successful 2022 Rate Case application.
