

## Aspen Environmental Group

[www.aspeneg.com](http://www.aspeneg.com)

Since 1991, Aspen's multidisciplinary staff has provided environmental compliance, impact assessment, and mitigation services for a wide spectrum of infrastructure, public works, and industrial projects. In addition, Aspen provides integrated energy analysis and planning services to government agencies, energy-focused organizations, and private clients. Aspen has effectively managed many complex, high-profile energy, infrastructure, and public works projects and managed large teams of subcontractors on behalf of both public and private clients. Aspen builds lasting client relationships through responsiveness, loyalty, anticipation of client needs, problem solving, and efficient management.

### Aspen's work summary

- Analyzed over 4,200 miles of transmission lines
- Analyzed over 45 renewable energy projects
- Analyzed 55,000 MW of power generation
- Monitored construction of more than 50 infrastructure projects
- Managed over 2,500 projects
- Analyzed over 900 alternatives
- Managed nearly 600 subcontractors
- Managed over 130 water resources projects
