

## August 2023 Month Ahead Capacity Procurement Mechanism Designations Report

### Designations Summary:

The California ISO issued capacity procurement mechanism designations to the resources listed below to cure a month-ahead system resource adequacy deficiency for August. The quantity of the designation was 186.06 megawatts (MW).

### Amount and Cost:

Resource ID	CPM MWs	Designated Start Date	CPM Type	Price \$/kW-mon	Tac Area
ELCAJN_6_LM6K	48.10	8/1/2023	CADEF	6.31	SYS
MRCHNT_2_PL1X3	82.25	8/1/2023	CADEF	6.31	SYS
CHINO_2_PESBT1	10.00	8/1/2023	CADEF	6.31	SYS
MARVEL_2_MARBT3	45.71	8/1/2023	CADEF	6.31	SYS

### Reason for CPM Exceptional Dispatch Designations:

The California ISO issued capacity procurement mechanism (CPM) designations to the resources identified above. Multiple scheduling coordinators failed to show sufficient resource adequacy capacity on August 2023 monthly Resource Adequacy Plans, which caused an overall net deficiency of 186.06 MW in meeting the total monthly demand and reserve margin requirements. The ISO issued the CPM designations under tariff section 43A.2.3 to address the deficiency.

The designations are effective for a one-month term running from August 1 through August 31, subject to the adjustment and payment provisions in the CPM tariff provisions. The resources listed above offered capacity to the ISO to use under CPM, and that capacity was not procured previously as resource adequacy capacity. The ISO procured total capacity of 186.06 MW from these resources.
