

Memorandum

To: ISO Board of Governors
From: Karen Edson, Vice President, Policy and Client Services
Date: January 29, 2015
Re: **Business practice manual change management report**

This memorandum does not require Board action.

This memorandum is a regular report required by the Federal Energy Regulatory Commission to inform the ISO Board of Governors on the status of the business practice manual change requests submitted by stakeholders and the California Independent System Operator Corporation.

The ISO inaugurated the public change management process for business practice manuals (BPMs) on April 1, 2009. Both the ISO and stakeholders use the same electronic system and process to submit and track proposed changes to the BPMs. The process includes stakeholder review, ISO approval or rejection, and a possible appeal to the BPM Appeals Committee, which is comprised of three ISO officers.

As of January 13, 2015, fourteen proposed revision requests (PRRs) were active in the BPM change management system and were all submitted by the ISO. These fourteen active PRRs affect the following BPMs:

- Energy Imbalance Market (1 request)
- Market Instruments (1 requests)
- Market Operations (5 requests)
- Metering (1 request)
- Reliability Requirements (3 requests)
- Scheduling Coordinator Certification and Termination (1 request)
- Settlements and Billing (2 requests)

PROCESS OVERVIEW

The ISO held a monthly BPM change management stakeholder meeting on December 16, 2014, where sixteen stakeholders participated. Based on stakeholder comments during the meeting and on the types of comments entered into the BPM change management electronic system, it appears that stakeholders are generally satisfied with the process.

BPM CHANGE MANAGEMENT REPORT

In compliance with the tariff reporting requirements, attachment 1 of this report:

- States the total number of active PRRs submitted by stakeholders and by the ISO;
- Depicts the active PRRs in various steps along the PRR lifecycle, as of January 13, 2015;
- Reflects that twenty-six PRRs were in final decision status for the period November 26, 2014 through January 13, 2015; and
- Includes PRRs currently under stakeholder appeal, the stakeholder positions on rejected PRRs, and the reasons for rejection.

The following is additional relevant information:

- There are no PRRs under stakeholder appeal.
- Three of the active PRRs were submitted into the electronic system by the ISO on an emergency basis.

The three emergency PRRs were submitted on an emergency basis as the proposed revisions required rapid implementation and related to:

- Flexible ramp constraint penalty price
- Pay for performance enhancement

A PRR report summarizing the content of each active PRR in the BPM change management system as of January 13, 2015, is included as attachment 2.
