

## The Brattle Group

[www.brattle.com](http://www.brattle.com)

Our economists provide clients with regulatory economic consulting, business strategy, and expert testimony before regulatory agencies, courts, and arbitration panels.

We assist electric utilities, deregulated power producers, customers, regulators, and policy makers around the world with planning and litigation support, and help to develop appropriate regulatory frameworks. Our experts offer a range of operational and financial tools and models for the simulation and forecasting of market structure and conduct. Our experience spans international electricity markets and is supported by our expertise in all aspects of the energy sector.
