The ISO is requesting written comments on the *Draft Final Proposal - Detailed Ranking of High Priority Market Enhancements* dated September 18, 2009.

BAMx has actively participated in the Market Initiatives Roadmap process. We remain concerned that CAISO continues to view the LAP Granularity issue as a high priority. For the reasons stated in BAMx' prior comments, and similar reasons cited by SCE, PG&E, NCPA, CCSF and the CPUC, BAMx believes that CAISO and market participant resources would be much better spent on other, more pressing market initiatives than the LAP Granularity issue.

¹ BAMx members are the Cities of Santa Clara and Palo Alto, and Alameda Municipal Power.
