**Clearway Energy** comments on the January 2026 Transmission Development Forum.

1. Mira Loma-Mesa Upgrade is missing in the TDF spreadsheet. Can CAISO look into this or point to where it's located?
2. Question for SCE regarding 2223-P-15, 2223-P-17, 2223-P-05, 2223-P-16 upgrades:
  - a. Can SCE confirm that all the long lead equipment have been ordered?
  - b. What are risks factors that can delay current ISD?
  - c. Can you explain what is the scope of CPUC permit application?
  - d. Do any of these upgrades need land acquisition outside of their current RoW?
  - e. What is driving 2223-P-15, 2223-P-16 ISD ?
3. PG&E's C12P1-NPT04 upgrade
  - a. What are the risk factors that can delay current ISD?
  - b. Can you explain what is the scope of CPUC permit application?
  - c. Given all three CB are upgraded at Vaca Dixon Substation 230 kV, would like to understand why ISD differ among them?
